The History of Education in Japan (1600 - 2000) Masashi Tsujimoto, Yoko Yamasaki, 2017-03-16 As one of the most rapid and earliest nations to achieve Western

modernisation much of Japan's success stems from its fruitful literacy history during the Tokugawa shogunate as well as later influences from Western educational ideals and consequent economic and democratic conflicts in Japan. This book seeks to enlighten readers on how education and schooling contributed to Japan's particular process of modernisation and industrialisation. These historical insights can be applied to crises in formal and systemised education today and form the basis of potential solutions to controversies faced by formal education in Japan and other nation states. A book that bridges the international information gap in Japan's history of education will be immensely valuable to historians of both international and Japanese education.

Education and Social Justice in Japan Kaori H. Okano, 2020-12-09 This book is an up to date critical examination of schooling in Japan by an expert in this field. It focuses on developments in the last two decades with a particular interest in social justice. Japan has experienced slow economic growth, changed employment practices, population decline, an aging society and an increasingly multi ethnic population resulting from migration. It has faced a call to respond to the rhetoric of globalization and to concerns in childhood poverty in the perceived affluence. In education we have seen developments responding to these challenges in national and local educational policies as well as in school level practices. What are the most significant developments in schooling of the last two decades? Why have these developments emerged and how will they affect youth and society as a whole? How can we best interpret social justice implications of these developments in terms of both distributive justice and the politics of difference? To what extent have the shifts advanced the interests of disadvantaged groups? This book shows that compared to three decades ago the system of education increasingly acknowledges the need to address student diversity of all kinds and delivers options that are more varied and flexible. But interest in social justice in education has tended to centre on the distribution of education: who gets how much of schooling with fewer questions raised about the content of schooling that continues to advantage the already advantaged. Written in a highly accessible style and aimed at scholars and students in the fields of comparative education, sociology of education and Japanese studies, this book illuminates changing policies and cumulative adjustments in the daily practice of schooling as well as how various groups in society make sense of these changes.
