Troughton, 2008-10-17 The new edition of this bestselling reference provides fully updated and detailed descriptions of plastics joining processes plus an extensive compilation of data on joining specific materials The volume is divided into two main parts processes and materials The processing section has 18 chapters each explaining a different joining technique. The materials section has joining information for 25 generic polymer families Both sections contain data organized according to the joining methods used for that material A significant and extensive update from experts at The Welding Institute A systematic approach to discussing each joining method including process advantages and disadvantages applications materials equipment joint design and welding parameters Includes international suppliers directory and glossary of key joining terms Includes new techniques such as flash free welding and friction stir welding Covers thermoplastics thermosets elastomers and rubbers **Plastic Films in Food Packaging** Sina Ebnesajjad, 2012-12-31 The value of the groceries purchases in the USA is over 500 billion annually most of which is accounted for by packaged foods Plastic packaging of foods is not only ubiquitous in developed economies but increasingly commonplace in the developing world where plastic packaging is instrumental in decreasing the proportion of the food supply lost to spoilage This new handbook is a combination of new material and updated chapters chosen by Dr Sina Ebnesajjad from recently published books on this subject Plastic Films in Food Packaging offers a practical handbook for engineers scientists and managers working in the food packaging industry providing a tailor made package of science and engineering fundamentals best practice techniques and guidance on new and emerging technologies By covering materials design packaging processes machinery and waste management together in one book the authors enable the reader to take a lifecycle approach to food packaging The Handbook addresses guestions related to film grades types of packages for different types of foods packaging technologies machinery and waste management Additionally the book provides a review of new and emerging technologies Two chapters cover the development of barrier films for food packaging and the

regulatory and safety aspects of food packaging Essential information and practical guidance for engineers and scientists working at all stages of the food packaging lifecycle from design through manufacture to recycling Includes key published material on plastic films in food packaging updated specifically for this Handbook and new material on the regulatory framework and safety aspects Coverage of materials and applications together in one handbook enables engineers and scientists to make informed design and manufacturing decisions
