Jetton, Cynthia Shanahan, 2012-01-25 From leading authorities in both adolescent literacy and content area teaching this book addresses the particular challenges of literacy learning in each of the major academic disciplines Chapters focus on how to help students successfully engage with texts and ideas in English literature science math history and arts classrooms The book shows that while general strategies for reading informational texts are essential they are not enough students also need to learn processing strategies that are quite specific to each subject and its typical tasks or problems Vignettes from exemplary classrooms illustrate research based
