Mathematical Excursions to the World's Great Buildings Alexander Hahn, 2012-07-22 Describes the mathematics behind the design of famous buildings including the Parthenon the Sydney Opera House and the Bilbao Guggenheim Modern Building John Winter, 1969 *Great Building of the World*, 1969 *Great Building Designs 1900 - Today* Ian Graham, 2015-08 Examines the development of architectural design from the Flatiron and Empire State Buildings to Burj Khalifa in Dubai and the Shard in London profiles noted architects and discusses the design process *The Architecture of Use* Stephen Grabow, Kent Spreckelmeyer, 2014-10-03 By analyzing ten examples of buildings that embody the human experience at an extraordinary level this book clarifies the central importance of the role of function in architecture as a generative force in determining built form Using familiar twentieth century buildings as case studies the authors present these from a new perspective based on their functional design concepts Here Grabow and Spreckelmeyer expand the definition of human use to that of an art form by re evaluating these buildings from an aesthetic and ecological view of function Each building is described from the point of view of a major functional concept or idea of human use which then spreads out and influences the spatial organization built form and structure In doing so each building is presented as an exemplar that reaches beyond the pragmatic concerns of a narrow program and demonstrates how functional concepts can inspire great design evoke archetypal human experience and help us to understand how architecture embodies the deeper purposes and meanings of everyday life **World Architecture and Society** Peter Louis Bonfitto, 2021-12-06 This two volume encyclopedia covers buildings and sites of global significance from prehistoric times to the present day providing students with an essential understanding of architectural development and its impact on human societies This two volume encyclopedia provides an in depth look at buildings and sites of global significance throughout history The volumes are separated into four regional sections 1 the Americas 2 Europe 3 Africa and the Middle East and 4 Asia and the Pacific Four regional essays investigate the broader stylistic and historical contexts that describe the development of architecture through time and across the globe Entries explore the unique importance of buildings and sites including the megalithic wonder of Stonehenge and the imposing complex of Angkor Wat Entries on Spanish colonial missions in the Americas and the medieval Islamic universities of the Sahara connect to broader building traditions Other entries highlight remarkable stories of architectural achievement and memory like those of Tuskegee University a site hand built by former slaves or the Hiroshima Peace Memorial Park which was built at the site of the atomic detonation Each entry focuses on the architectural but includes strong consideration of the social impact importance and significance each structure has had in the past and in the present Ancient Times James Breasted, 2018-01-19 In the selection of subject matter as well as in style and diction it has been the purpose of the author to make this book sufficiently simple to be put into the hands of first year high school pupils A great deal of labor has been devoted to the mere task of clear and simple statement and arrangement While simple

enough for first year high school work it nevertheless is planned to interest and stimulate all students of high school age In dealing with each civilization a sufficient framework of political organization and of historical events has been laid down but the bulk of the space has been devoted to the life of man in all its manifestation society industry commerce religion art literature These things are do presented as to make it clear how one age grows out of another and how each civilization profits by that which has preceded it Vernacular Architecture in the 21st Century Lindsay Asquith, Marcel

Vellinga, 2006-03-10 The issues surrounding the function and meaning of vernacular architecture in the twenty first century are complex and extensive Taking a distinctively rigorous theoretical approach this book considers these issues from a number of perspectives broadening current debate to a wider multidisciplinary audience These collected essays from the leading experts in the field focus on theory education and practice in this essential sector of architecture and help to formulate solutions to the environmental disaster management and housing challenges facing the global community today

The American Spirit in Architecture Talbot Hamlin, 1926 Building Modern Houston Anna Mod, 2011 Founded in 1836 Houston is now the country s fourth largest city In the early 20th century Houston s economy shifted from agriculture to oil fueling the city s explosive growth in the following decades Houston grabbed the reins and saw a building boom in commercial residential and civic architecture redefine the city and skyline Modernism was a new and fresh architectural expression and the perfect complement to the city s can do entrepreneurial spirit The 1960s brought ground breaking ceremonies for the National Aeronautics and Space Administration s NASA headquarters while residents and tourists alike lined up to tour the revolutionary new Astrodome Building Modern Houston tells the story of Houston s architecture during its transformation from Bayou City to Space City **The Buildings Around Us** Thom Gorst, 2003-09-02 Buildings surround and affect us all In this clear and concise introduction to buildings Thom Gorst demystifies the culture of architecture and shows how an interest in our environment whatever our cultural position can be of great value to us *Culture and Democracy* Hugh Dalziel Duncan, 1989-01-01 This work by the late and great sociologist Hugh Dalziel Duncan paints the great panorama of the Middle West where egalitarianism is the most cherished value and money is the most important vehicle of life How art finds a place in this society is shown in the specific struggle between the architects businessmen unionists and educators of Chicago Into such specifics Duncan reveals the place of supposedly abstract theories developed by John Dewey George Herbert Mead Thorstein Veblen and above all Louis H Sullivan whose school of architecture presents both a new form of physical design and a new order of society The rise seeming defeat and final triumph of Sullivan s principles of order in architecture are related to his social and aesthetic theories of form in society In democratic society all individuals must be capable of art just as all individuals share in art as experience Sullivan s description of the development within the individual of the idea of architecture is treated as an allegory of such development in the spirit of democratic values His life is offered as a parable of the problem facing American artists as they attempt to root art in democratic culture

In Sullivan's words The critical study of architecture becomes not merely the direct study of art but in extenso a study of the social conditions producing it The study of a newly shaping type of civilization By this light the study of architecture becomes naturally and logically a branch of social science Duncan's exceptional volume written with grace and clarity registers the achievements of this Chicago School showing how culture and democracy reached a special moment of consensus with the money based economy of our time

**New York** Ric Burns, James Sanders, Lisa Ades, 2021-11-23 An expanded edition of the only comprehensive illustrated history of New York with more than 600 ravishing photographs and illustrations that tells the remarkable 400 year long story of the city from its beginning in 1624 up to the current moment The companion volume to the acclaimed PBS series This landmark book traces the spectacular growth of New York from its initial settlement on the tip of Manhattan through the destruction wrought by the Revolutionary War to its rise as the nation's premier commercial capital and industrial center and as a magnet for immigrant hopes and dreams in the 19th century to its standing as a beacon of modern culture in the 20th century and as a worldwide symbol of resilience in the 21st century The story continues here with new chapters delivering a sweeping portrait of New York at the dawn of the 21st century when it emerged after decades of decline to assert its place at the very center of a new globalized culture Here is a city challenged indeed sometimes shaken to its core by a series of profound crises the aftermath of 9/11 the continual struggle with racial injustice the financial crisis of 2008 the devastation of Superstorm Sandy the still unfolding cataclysm of the COVID-19 pandemic whose earliest and deadliest urban epicenter was New York itself Here too is a lively portrait of the city's vibrant street life and culture the birth of hip hop in the South Bronx Christo and Jeanne Claude's Gates in Central Park the musicals of Broadway the explosion in location filmmaking in every borough the pivotal rise of the tech industry and so much more The history of this city especially in the tumultuous and transformative two decades detailed in the new chapters is an epic story of rebirth and growth an astonishing transfiguration still in progress of the world's first modern city into a model and prototype for the global city of the future
