Modern Concepts Of The Theory Of The Firm:

Modern Concepts of the Theory of the Firm Günter Fandel, Uschi Backes-Gellner, Manfred Schlüter, Joerg E. Staufenbiel, 2013-03-09 This volume contains the results of the International Conference on Managing Enterprises of the New Economy by Modern Concepts of the Theory of the Firm which took place in Hagen from 12-14 December 2002. The conference was organised jointly by the FernUniversität in Hagen and the Erich Gutenberg Arbeitsgemeinschaft in Cologne. The Deutsche Forschungsgemeinschaft, the FernUniversität and the Märkische Bank in Hagen provided generous financial support for the conference and in fact enabled its implementation and the publication of this record of the proceedings. We would like to express our gratitude to the sponsors for their support. The aim of the conference was the exchange of academic experience with regard to new approaches to and extensions of the theory of the firm that can be used to solve the problems of New Economy companies. The starting point was the practical experience that the owners and managers of New Economy companies paid too little attention to functional company controls in the general euphoria regarding future economic trends and that because of this the enterprises got into difficulties or were faced with threats to their survival. These control deficits were detected equally in the areas of sales, production, personnel, planning, organisation and finance and in the arrangement of management and control structures. Deficiencies in company evaluations and accounting led to investors experiencing severe disappointment on the loss of their invested capital.

Modern Concepts of the Theory of the Firm Günter Fandel, Uschi Backes-Gellner, Manfred Schlüter, Joerg E. Staufenbiel, 2013-01-22 The authors analyse the New Economy from a scientific point of view. The success and the failure of enterprises of the new economy form a challenge to the modern business management and to the theory of the firm. This conference transcript answers the question in which way well established concepts of the theory of the firm should be modified or new approaches should be created in order to run enterprises of the new economy successfully. The discussion includes various fields of the theory of the firm and is therefore divided into the six essential disciplines of economic research which are Production and Procurement, Finance, Marketing, Accounting, Human Resource Management and Economic Organization and Corporate Governance. The international orientation of the book addresses the world-wide scientific community.

The Theory of the Firm and Chinese Enterprise Reform Qin Xiao, 2004 Changes to corporate structure including the role of the corporate headquarters have been key factors in bringing about economic reform in China. In this penetrating and insightful book Xiao questions the conventional theory of the firm, arguing that the ultimate goal of the headquarters of modern large corporations is to function as a substitute for the market and introducing a new explanation for the nature of the firm: the substitution function model. He provides an insider's account of the reforms in CITIC and as such this is a rare narrative that should be essential reading for scholars and practitioners who care about the theory and practice of the firm in particular in the context of Chinese enterprise reform.
