Marshall and Worthing's The Construction of Houses Duncan Marshall, Derek Worthing, Nigel Dann, Roger Heath, 2021-03-30 The sixth edition of The Construction of Houses builds on the success of the previous five editions The book provides a comprehensive introduction to the principles and processes of the construction of houses and their services As such it is aimed at providing a broad understanding of domestic building construction for students as part of their academic studies and as a useful information source for practitioners The existing chapters have all been updated and most of them expanded to take account of changes to dwelling house construction since the last edition and there are new chapters on Modern Methods of Construction and Regulatory controls and building standards Additionally many new and/or updated photographs and diagrams have been added As with the previous editions the authors have concentrated on presenting current mainstream approaches to the construction of houses The detailed yet accessible text that is supported by hundreds of coloured photographs and diagrams provides clear explanations of the many complex processes that go into the building of a house A deeper insight into modern construction is also given by the book's consideration of historical building techniques from the 18th century onwards in order to illustrate how and why we build houses in the way we do now

The Construction of Houses Duncan Marshall, Derek Worthing, 2008-09-24 Aimed specifically at those students and practitioners who require a broad understanding of building construction as part of a wider sphere of professional activity The book provides a comprehensive introduction to the principles and practice of modern construction and services In addition most chapters contain information on earlier construction techniques to reflect the age profile of the UK housing stock This fourth edition has a revised text and hundreds of revised graphics new illustrations and photos an additional chapter on concrete housing and an eight page colour section showing a series of photographs of a modern housing development This book is the recommended construction text at a number of colleges and universities It concentrates on principles and practice rather than details and regulations In doing so it should enable the reader to demonstrate a comprehensive and genuine understanding of modern house construction and its evolution over the last 100 years

The Grenfell Tower Fire Tony Sullivan, 2025-04-28 Examines the systemic failures and deregulation that led to the Grenfell Tower fire tragedy from a firefighter's perspective In the early hours of 14th June 2017 a fire began in a kitchen on the fourth floor of a twenty four storey block of flats in West London A fire that should have been contained within the original compartment ripped up the outside of the building within minutes Procedures and systems that had worked for decades failed resulting in the loss of

seventy two lives Yet this was not the first time a breakdown of compartmentation had caused a loss of life Just eight years earlier a fire at Lakanal House in South London had claimed the lives of six people How then could this happen again Nor was it just one failure as panels inadequate fire stopping construction of the windows failure of fire doors and the smoke ventilation system all contributed to the rapid fire spread This book gives a firefighter s perspective of the deregulation that caused the tragedy and describes what firefighters were confronted with that June night in 2017 It places that deregulation chronologically alongside a career that spanned three decades including nine years in the training department of the London Fire Brigade It proposes the causes are far deeper and wider than many think A systemic deterioration of standards in testing of materials building control maintenance inspections fire safety and enforcement
