Modern Technology of Acid Slurry, Surfactants, Soap and Detergents with Formulae, **Perfumes, Cosmetics and Soaps** William Arthur Poucher, 2013-11-11 W A Poucher's original Perfumes Cosmetics and Soaps first published in 1923 were the first comprehensive text books to deal exclusively with the work of the perfume and cosmetic industry and received recognition and approval throughout the world Their success and popularity was due primarily to the fact that they provided a practical guide not only to those engaged in the industry but to a section of readers interested in the mystique and romance which at that time was associated with the perfume and cosmetic arts It was also an outstanding feature that the books were easily readable subject matter being expressed in a clear and understandable fashion without the frills of pseudo science or advanced technology In revising Volume III and editing Volume I it has been my aim to continue in the pattern and style of their author and to this end I have not intended to write a new book but have attempted a true revision and it is a remarkable fact that many of the original writings made nearly 50 years ago can still apply to an industry which since that time has developed beyond recognition

The Science of Beauty Annelie Ramsbrock, 2015-05-20 What did the cosmetic practices of middle class women in the nineteenth century have in common with the repair of men's bodies mutilated in war What did the New Woman of the Weimar years have to do with the field of social medicine that emerged in the same period They were all part of a conversation about the cosmetic modification of bodies a debate shaped by scientific knowledge and normative social models Conceived as a cultural history this book examines the history of artificially created beauty in Germany from the late Enlightenment to the early days of National Socialist rule **Race and Beauty** Josie Schoel, 2025-04-29 This work examines how beauty standards specifically the ideology of fairness contributed to the racialization of bodies in early modern England

Schoel emphasizes the need to dismantle whiteness's invisibility in historical criticism noting that it has long been an unexamined norm. By focusing on the materiality of cosmetic whiteness the text aims to disrupt colorblind ideologies and reveal the mechanisms behind white supremacy. Drawing on diverse texts like sonnets, travel literature and medical treatises the book discusses how light skin and hair were idealized symbolizing Christian virtue and femininity. This rhetoric of fairness not only promoted racial hierarchies but also constructed whiteness through cosmetics like whitening creams and exfoliants. These practices associated with Queen Elizabeth I's image and widely reproduced in theater, medicine and household texts led to a cult of whiteness. The locus of the cult was Queen Elizabeth I whose materially constructed reds and whites in her portraiture and on the surface of her skin resounded throughout the commonwealth. If the cult of whiteness was founded by Elizabeth's propagandistic image campaign it was facilitated and reproduced through theatrical productions, medical treatises, household manuals and the birth of the apothecary which made the materials of whiteness accessible to a wider, socially diverse network of consumers. The book is not only an ideal resource for students and scholars of early modern studies, performance and Critical Race Studies but for all those seeking an introduction to constructions of race in early modern England.

Language, Globalization and the Making of a Tanzanian Beauty Queen Sabrina Billings, 2013-11-29. Through micro analysis of language use this book chronicles young women's pathways to becoming a Tanzanian beauty queen offering an original perspective on the intersection of language with globalization, nationalism and inequality in urban East Africa. This compelling linguistic ethnography considers the real life effects both on and off stage of language policy, education and gender dynamics for the women competing in the pageants. While highlighting many contestants' struggles for escape from poverty and patriarchy the book also emphasizes their creative strategies, linguistic and otherwise for bettering their lives and shows how people living in a global economic periphery take part in and sometimes feel left out of the wider world.

Beauty Up Laura Miller, 2006-07-15. This engaging introduction to Japan's burgeoning beauty culture investigates a wide range of phenomenon: aesthetic salons, dieting, products, male beauty activities and beauty language to find out why Japanese women and men are paying so much attention to their bodies. Laura Miller uses social science and popular culture sources to connect breast enhancements, eyelid surgery, body hair removal, nipple bleaching and other beauty work to larger issues of gender ideology, the culturally constructed nature of beauty ideals and the globalization of beauty technologies and standards. Her sophisticated treatment of this timely topic suggests that new body aesthetics are not forms of deracialization but rather innovative experimentation with identity management. While

recognizing that these beauty activities are potentially a form of resistance Miller also considers the commodification of beauty exploring how new ideals and technologies are tying consumers even more firmly to an ever expanding beauty industry By considering beauty in a Japanese context Miller challenges widespread assumptions about the universality and naturalness of beauty standards *Cosmetics and Dermatologic Problems and Solutions* Zoe Diana Draelos,2011-09-01 Cosmetics for skin hair and nails play a vital part in the management and treatment of many dermatological conditions unfortunately they may also at times be the cause of some dermatological problems They are therefore subjects where dermatologists need to be aware of the major commercial developments taking place in addition to the many comm
