Modern Fiscal Issues Essays In Honor Of Carl S Shoup:

Modern Fiscal Issues Richard Miller Bird, John G. Head, 1981 Modern Fiscal Issues Richard M. Bird, John G.

Head, 1972-12-15 The contributors to this work all leading economists in their own right are a few of the many colleagues former students and friends of Carl Shoup who have benefitted from his many years as a leading teacher and scholar of public finance They dedicate this book to their mentor on the occasion of his seventieth birthday in recognition of his intellectual probity and wide influence on thinking about public finance throughout the last forty years Matching the breadth of interest of Professor Shoup's life long work in the field this collection of essays covers the range of modern thinking on public finance from theoretical concepts such as public goods to eminently practical fiscal issues like value added tax The traditional but still relevant fiscal issues government accounting international taxation taxation in developing countries metropolitan fiscal problems income taxation and tax structure are discussed along with new concerns such as modern public expenditure theory and environmental theory The book will be a useful addition to university and college libraries and will prove invaluable to public finance scholars and others interested in modern thinking on vital fiscal issues **Catching**

Capital Peter Dietsch, 2015-07-01 Rich people stash away trillions of dollars in tax havens like Switzerland the Cayman Islands or Singapore Multinational corporations shift their profits to low tax jurisdictions like Ireland or Panama to avoid paying tax Recent stories in the media about Apple Google Starbucks and Fiat are just the tip of the iceberg There is hardly any multinational today that respects not just the letter but also the spirit of tax laws All this becomes possible due to tax competition with countries strategically designing fiscal policy to attract capital from abroad The loopholes in national tax regimes that tax competition generates and exploits draw into question political economic life as we presently know it They undermine the fiscal autonomy of political communities and contribute to rising inequalities in income and wealth Building on a careful analysis of the ethical challenges raised by a world of tax competition this book puts forward a normative and institutional framework to regulate the practice In short individuals and corporations should pay tax in the jurisdictions of which they are members where this membership can come in degrees Moreover the strategic tax setting of states should be limited in important ways An International Tax Organisation ITO should be created to enforce the principles of tax justice The author defends this call for reform against two important objections First Dietsch refutes the suggestion that regulating tax competition is inefficient Second he argues that regulation of this sort rather than representing a constraint on national sovereignty in fact turns out to be a requirement of sovereignty in a global economy The book closes with a series of reflections on the obligations that the beneficiaries of tax competition have towards the losers both prior to any institutional reform as well as in its aftermath **The Economics Of Public Finance** Alan Blinder, 2011-07-01 This is the thirty fifth volume in the Brookings Studies of Government Finance series In the first of its four essays Analytical Foundations of Fiscal Policy Alan S Blinder of Princeton University and Robert M Solow of the Massachusetts Institute of Technology survey the

theoretical and empirical underpinnings of fiscal policy After discussing how the influence of fiscal policy on macroeconomic activity ought to be assessed the authors examine and find inadequate the dictum that government should balance the budget rather than the economy They defend again both theoretically and empirically the efficacy of fiscal policy against the monetarist challenge From an examination of the lags and uncertainties in the operation of fiscal policy and an analysis of the 1968 70 income tax surcharge they conclude that although much remains to be learned about the econometrics of policy multipliers the post surcharge experience in no way undermines the theoretical foundations of fiscal policy Where the burdens of various taxes fall has been a matter of intense interest to economic theorists in the last twenty years As public expenditures and taxpayer resistance rise not only must policy makers try to distribute the burdens of taxation equitably but they must also attempt to move toward national goals by judicious use of tax instruments George F Break of the University of California at Berkeley in *The Incidence and Economic Effects of Taxation* a comprehensive review of recent tax literature focuses on the theoretical studies that have helped to expand knowledge of tax incidence and the empirical studies that support newly developed hypotheses In each area he surveys the design of theoretical and general sales and income taxes the effect of economic choices both of individuals and businesses on the national well being Break indicates the ground still to be covered and the potential benefits of further inquiry In *Public Expenditure Budgeting* Peter O Steiner of the University of Michigan explores the literature dealing with the hard questions underlying public expenditures What is the public interest How does the community decide whether the government should undertake or finance a given activity instead of leaving it to a private action or inaction On what basis should incremental expenditure decisions of governmental units be made Steiner reviews the various approaches scholars have taken to the difficult questions surrounding the appropriateness of governmental provision of particular goods and services Although he finds none of the models fully satisfactory his work contributes to the debate concerning the process by which collective values are articulated and collective decisions come to be accepted as binding Dick Netzer's *State Local Finance and Intergovernmental Fiscal Relations* clarifies the debate that centered around the initial proposals for revenue sharing The author Dean of New York University's Graduate School of Public Administration explores the appropriate distribution of responsibility for public services among federal state and local governments the appropriate revenue systems for the subnational governments and the appropriate means of coordinating the systems with the responsibilities
