discusses certain specific concepts of the United Nations Convention on Contracts for the International Sale of Goods CISG in light of the CISG's recent fortieth anniversary. The most prominent influence of EU law on national private law systems is in the area of the law of obligations; thus the book focuses on several EU private law directives that cover the issues belonging to contract and tort law as interpreted in the case law of the Court of Justice of the EU. EU private law concepts need to be interpreted autonomously and uniformly rather than through the lens of national private law systems. The same is true for the CISG which has not only been one of the most successful instruments of the international trade law unification but has also influenced both the EU private law and domestic laws. In Part I focused on the EU private law and its effects for national laws, chapters examine the recent Digital Content and Services Directive and its likely impact on the contract law of the UK and Ireland, the role aggressive commercial practices play in EU banking and credit legislation, the applicability of the EU private international law rules to collective redress, the unfair contract terms regime of the Late Payment Directive and its transposition into Croatian law, the implementation of the Commercial Agency Directive in Denmark, Estonia and Germany, and disgorgement of profits as remedy provided in the Trade Secrets Directive. In Part II dealing with selected CISG issues, chapters discuss the autonomous interpretation of CISG's concept of sale by auction and its notion of intellectual property as well as the CISG's principle of freedom of form and the possibility for reservations with the effect of its exclusion. The book will be of interest to legal scholars in the field of EU private law and international trade law as well as to the students, practitioners, members of law reform bodies and civil servants in Europe and beyond.

**The Private Enforcement of Competition Law in Ireland** David McFadden, 2014-07-18. Competition is recognised as a key driver of growth and innovation. Competition ensures that businesses continually improve their goods and services whilst striving to reduce their costs. Anti-competitive conduct by businesses such as price fixing causes harm to the economy, to other businesses and to consumers. It is small businesses and the consumer who ultimately pay the price for anti-competitive conduct. A coherent competition policy that is both effectively implemented and effectively enforced is essential in driving growth and innovation in a market economy. The importance of competition was recently emphasised when the EU, ECB, IMF Troika included a number of competition specific conditions to the terms of Ireland's bailout. Both Irish and Community law recognise the right for parties injured by anti-competitive conduct to sue for damages. This right to damages in theory allows those that have suffered loss to recover that loss whilst helping to deter others from taking the illegal route to commercial success. However, private actions for damages in Ireland are rare. This book asks what the purpose of private competition litigation is and questions why there has been a dearth of this litigation in Ireland. The author makes a number of suggestions for reform of the law to enable and encourage private competition litigation. The author takes as his starting point the European Commission's initiative on damages actions for breach of the EC antitrust rules and compares the position in Ireland to that currently found in the UK and US.
