Modern Italy, 1982      *Modern Italy*, 2002      Modern Italy Carlo Bertelli, Alberto Abruzzese, 1983      Modern Italy, 1982      *Modern Italy*, 1984      Italy in the Nineteenth Century John A. Davis, 2000-09-21 The Short Oxford History of Italy series in seven volumes will offer a complete History of Italy from the early middle ages to the present and in each period will present the most recent historical perspectives on Italian history This means setting Italian history in the broader context of European history as a whole It also means questioning accepted interpretations of Italian history in each of these periods and in particular the idea that Italy's history has been significantly different from that of the rest of Europe Each volume will emphasise how developments in Italy in each period are best understood as variants on broader European patterns of political economic social and cultural change This volume covers the period from the French Revolution to the end of the Nineteenth Century Consisting of nine essays written by leading British and American historians the volume shows how Italy's unexpected political unification and independence were inseparable from the impact of the broader processes of modernisation that were changing the face of Europe and the fabric of European society The social and political tensions that fuelled the struggles for independence were rooted in Italy's difficult modernisation which continued thereafter to threaten the consolidation of the new Italian state But Italy's difficult modernisation did not preclude real change and although Italy entered the twentieth century as a highly imperfect democracy it was not noticeably more imperfect illiberal or divided than its nineteenth century European counterparts nor did the new challenges posed by the rise of mass society make fascism an inevitable outcome of the Risorgimento Italy in the Nineteenth Century provides both the general and specialist reader with a critical but concise introduction to the most recent historical debates and perspectives      **The Rise and Fall of American Art, 1940s-1980s** Assoc Prof Catherine Dossin, 2015-03-28 This book challenges the perception of New York as the undisputed center of the art world between the end of World War II and the fall of the Berlin Wall a position of power that brought the city prestige money and historical recognition In her transnational and interdisciplinary study Dossin analyses changing distributions of geopolitical and symbolic power in the Western art worlds a story that spans two continents forty years and hundreds of actors      *The Rise and Fall of American Art, 1940s-1980s* Catherine Dossin, 2016-03-03 In *The Rise and Fall of American Art 1940s 1980s* Catherine Dossin challenges the now mythic perception of New York as the undisputed center of the art world between the end of World War II and the fall of the Berlin Wall a position of power that brought the city prestige money and historical recognition Dossin reconstructs the concrete factors that led to the shift of international attention from Paris to New York in the 1950s and documents how peripheries such as Italy Belgium and West Germany exerted a decisive influence on this displacement of power As the US economy sank into recession in the 1970s however American artists and dealers became increasingly dependent on the support of Western Europeans and cities like Cologne and Turin emerged as major commercial and artistic hubs a development that enabled European artists to return to the

forefront of the international art scene in the 1980s Dossin analyses in detail these changing distributions of geopolitical and symbolic power in the Western art worlds a story that spans two continents forty years and hundreds of actors Her transnational and interdisciplinary study provides an original and welcome supplement to more traditional formal and national readings of the period *Italia moderna.
