 Charles L. Garrett,1998 Modern Electrics and Mechanics ,1914 **Makers of Modern Architecture, Volume II**
 Martin Filler,2013-08-20 In the first volume of Makers of Modern Architecture 2007 Martin Filler examined the emergence of
 that revolutionary new form of building and explored its aesthetic social and spiritual aspirations through illuminating
 studies of some of its most important practitioners from Louis Sullivan and Frank Lloyd Wright to in our own time Renzo
 Piano and Santiago Calatrava Now in Makers of Modern Architecture Volume II Filler continues his investigations into the
 building art beginning with the historical eclecticism of McKim Mead and White best remembered today for New York City's
 demolished Pennsylvania Station He surveys the seemingly inexhaustible flow of new books about Wright and Le Corbusier
 and continues his commentaries on Piano's museum buildings with an essay focused on the new Broad Contemporary Art
 Museum in Los Angeles There are less well known subjects here too from the Frankfurt urban planner Ernst May to
 Buckminster Fuller inventor of the geodesic dome Filler judges Edward Durell Stone the architect of the U S embassy in New
 Delhi the Huntington Hartford Museum in New York City and the Kennedy Center in Washington to have been a middling
 product of his times however personally interesting he may have been And he looks back at James Stirling who in the 1970s
 and 1980s was a veritable rock star of the profession responsible for what Filler considers some of the very few worthwhile
 postmodernist buildings The essays collected here are not entirely historical however Filler also focuses on some of the most
 recent projects to have attracted critical and popular attention both in the United States and abroad including Rem Koolhaas's
 CCTV building in Beijing and Bernard Tschumi's Acropolis Museum in Athens He argues that Kazuyo Sejima and Ryue
 Nishizawa's New Museum in New York City is one of those rare clarifying works of architecture that makes most recent
 buildings of the same sort look suddenly ridiculous He calls Tod Williams and Billie Tsien's brilliant reimaging of the Barnes
 Collection in Philadelphia a latter day miracle a virtually unimprovable setting for its art He finds Michael Arad's September
 11 Memorial at Ground Zero a sobering disturbing heartbreaking and overwhelming masterpiece And he argues that Diller

Scofidio Renfro's Institute of Contemporary Art in Boston and their work revitalizing the High Line and Lincoln Center in New York make them today's shrewdest yet most sympathetic enhancers of the American metropolis. Filler remains in these nineteen essays a shrewd observer of the pressures on architects and their projects: money, politics, social expectations, even the weight of their own reputations. But his focus is always on the buildings themselves, on their sincerity and directness, on their form and their function, on their capacity to bring delight to the human landscape. Encyclopedia of Historians and Historical Writing Kelly Boyd, 2019-10-09. The Encyclopedia of Historians and Historical Writing contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama. Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day, including individuals from related disciplines like Jürgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate. Additionally, the Encyclopedia includes some 200 essays treating the development of national, regional, and topical historiographies from the Ancient Near East to the history of sexuality. In addition to the Western tradition, it includes substantial assessments of African, Asian, and Latin American historians and debates on gender and subaltern studies. *Popular Electricity and Modern Mechanics*, 1914. Popular Mechanics, 1970-07. Popular Mechanics inspires, instructs, and influences readers to help them master the modern world. Whether it's practical DIY home improvement tips, gadgets, and digital technology information on the newest cars or the latest breakthroughs in science, PM is the ultimate guide to our high-tech lifestyle. **Eco-Sonic Media** Jacob Smith, 2015-06-05. The negative environmental effects of media culture are not often acknowledged: the fuel required to keep huge server farms in operation, landfills full of high-tech junk, and the extraction of rare minerals for devices reliant on them are just some of the hidden costs of the contemporary mediascape. Eco-Sonic Media brings an ecological critique to the history of sound media technologies in order to amplify the environmental undertones in sound studies and turn up the audio in discussions of greening the media. By looking at early and neglected forms of sound technology, Jacob Smith seeks to create a revisionist, ecologically aware history of sound media. Delving into the history of pre-electronic media like hand-cranked gramophones, comparatively eco-friendly media artifacts such as the shellac discs that preceded the use of petroleum-based vinyl, early forms of portable technology like divining rods, and even the use of songbirds as domestic music machines, Smith builds a scaffolding of historical case studies to demonstrate how green media archaeology can make sound studies vibrate at an ecological frequency while opening the ears of eco-criticism. Throughout this eye-opening and timely book, he makes readers more aware of the costs and consequences of their personal media consumption by prompting comparisons with non-digital, non-electronic technologies and by offering different ways in which sound media can become eco-sonic media. In the process, he forges interdisciplinary connections, opens new avenues of research, and poses fresh theoretical questions for

scholars and students of media sound studies and contemporary environmental history
