In addition to the chapter on Worms and Leeches, this book covers Baitfish, Insects, Salamanders, Frogs, Crustaceans and Other Natural Baits such as salmon eggs and clams. Complete information on how to catch and keep these baits is followed by sections on how to actually use each live bait type. New on the freshwater fishing scene in recent years is the use of dough baits and scents. Which one to choose plus how and when to use each is fully explained. Equipment is discussed in detail: hooks, bobbers, sinkers, rods and reels. The authors suggest many tips for using different kinds of equipment in various fishing locations and situations. The final chapter matches common freshwater fish species with the best kind of live bait to use depending on where the fish are and what time of year it is.

The latest information on Chronic Wasting Disease and other deer-specific ailments are discussed. *Hunting Techniques* shows readers how the experts stand, hunt, still hunt, stalk or drive deer in different situations and habitats.
