Native American studies **Sex Estimation of the Human Skeleton** Alexandra R. Klales, 2020-05-30 Sex Estimation of the Human Skeleton is a comprehensive work on the theory methods and current issues for sexing human skeletal remains This work provides practitioners a starting point for research and practice on sex estimation to assist with the identification and analysis of human remains It contains a collection of the latest scientific research using metric and morphological methods and contains case studies where relevant to highlight methodological application to real cases This volume presents a truly comprehensive representation of the current state of sex estimation while also detailing the history and how we got to this point Divided into three main sections this reference text first provides an introduction to the book and to sex estimation overall including a history practitioner preferences and a deeper understanding of biological sex The second section addresses the main methodological areas used to estimate sex including metric and morphological methods statistical applications and software Each chapter topic provides a review of older techniques and emphasizes the latest research and methodological improvements Chapters are written by practicing physical anthropologists and also include their latest research on the topics as well as relevant case studies The third section addresses current considerations and future directions for sex estimation in forensic and bioarchaeological contexts including DNA secular change and medical imaging Sex Estimation of the Human Skeleton is a one of a kind resource for those involved in estimating the sex of human skeletal remains Provides the first comprehensive text reference on sex estimation with historical perspectives and current best practices Contains real case studies to underscore key estimation concepts Demonstrates the changing role of technology in sex estimation Human Paleoneurology Emiliano Bruner, 2014-07-21 The book presents an integrative review of paleoneurology the study of endocranial morphology in fossil species The main focus is on showing how computed methods can be used to support advances in evolutionary neuroanatomy paleoanthropology and archaeology and how they have contributed to creating a completely new perspective in cognitive neuroscience Moreover thanks to its multidisciplinary approach the book addresses students and researchers approaching human paleoneurology from different angles and for different purposes such as biologists physicians anthropologists archaeologists and computer scientists The individual chapters written by international experts represent authoritative reviews of the most important topics in the field All the concepts are presented in an easy to understand style making them accessible to university students newcomers and also to anyone interested in understanding how methods like biomedical imaging digital anatomy and computed and multivariate morphometrics can be used for analyzing ontogenetic and phylogenetic changes according to the principles of functional morphology morphological integration and modularity *Methods in Paleoecology* Darin A. Croft, Denise F. Su, Scott W. Simpson, 2018-10-27 This volume focuses on the reconstruction of past ecosystems and provides a comprehensive review of current techniques and their application in exemplar studies The 18 chapters address a wide variety of topics that span vertebrate paleobiology and paleoecology body mass postcranial functional morphology evolutionary dental morphology

microwear and mesowear ecomorphology mammal community structure analysis contextual paleoenvironmental studies paleosols and sedimentology ichnofossils pollen phytoliths plant macrofossils and special techniques bone microstructure biomineral isotopes inorganic isotopes 3 D morphometrics and ecometric modeling A final chapter discusses how to integrate results of these studies with taphonomic data in order to more accurately characterize an ancient ecosystem Current investigators advanced undergraduates and graduate students interested in the field of paleoecology will find this book immensely useful The length and structure of the volume also makes it suitable for teaching a college level course on reconstructing Cenozoic ecosystems

Dynamics of Learning in Neanderthals and Modern Humans Volume 2

Takeru Akazawa,Naomichi Ogihara,Hiroki C Tanabe,Hideaki Terashima,2014-01-27 This volume is the second of two volumes of proceedings from the International Conference on the Replacement of Neanderthals by Modern Humans which took place in Tokyo in November 2012 This second volume reports in four major sections findings by cultural anthropologists physical anthropologists engineering scientists and neurophysiologists integrated in multidisciplinary fashion to solidify the overall understanding of the mechanics of replacement from cognitive and physical perspectives Part 1 provides examinations of replacement related questions from various perspectives in cognition and psychology Part 2 consisting of studies rooted in body science and genetics provides detailed findings which fill in the broader frame of the replacement phenomenon Part 3 presents a collection of papers whose findings about fossil crania and brain morphology shed direct light on immediate questions regarding replacement Part 4 provides illuminations similar to those in part 3 but arising from the analytical empowerment afforded by neuroscience The collection of 26 papers in this volume makes available to readers both broad and narrow insights on the mechanisms of the replacement assimilation of Neanderthals by modern humans and at the same time provides a model of new paradigm multidisciplinary collaboration on a complex problem
