On The Compositional Nature Of The Aspects:

On the Compositional Nature of the Aspects H.J. Verkuyl, 2013-03-09 This book is a thesis submitted to the Faculty of Arts of the University of Utrecht It was prepared under the supervision of Prof Dr H Schultink I would like to express my gratitude to him for his criticisms of earlier versions which led to many improvements in particular with respect to the exposition of the argument To my co referent Dirk van Dalen reader in the Department of Philosophy Centrale Interfaculteit of the University of Utrecht I am greatly indebted for his valuable and fruitful suggestions about problems relevant to both linguistics and logic Several ideas developed in this study owe their present concrete form to our many discussions This thesis originates in syntactic research into the Aspects carried out in 1967 under the supervision of Albert Kraak professor at the University of Nijmegen who ever since gave much attention to my work in progress I am very grateful to him for his careful and stimulating criticism as well as for the continuous support he gave me during these years The present study closely relates to the work of my colleague Wim Klooster with regard to both its theoretical framework and its subject matter Our joint work on the measurement of duration in Dutch is an integral part of the argument I have greatly profited from the numerous discussions we have had On the compositional nature of the aspects Hendrik Jacob Verkuyl, 1971

The Compositional Nature of Tense, Mood and Aspect H. J. Verkuyl, Henk J. Verkuyl, 2021-10-14 A linguistic view of how natural language speakers package and open information to deal with the expression of time **On the Compositional Nature of States** E. Matthew Husband, 2012 This monograph pursues a structural analogy between the availability of an existential interpretation in states and the telicity of events Focusing on evidence from both verbal and adjectival predicates it argues that quantization forms the basis of a unified theory of aktionsart and provides a theory in which the availability of an existential interpretation in states is like the telicity of events determined compositionally by the predicate and the quantization of its internal argument Quantization is further argued to reflect the internal temporal constitution of the stages of an individual which is tied to the generation of an existential interpretation This monograph will be of interest to syntacticians and semanticists who are specifically concerned with compositional approaches to eventualities and to those who have a more general interest in the role linguistic theory can play in determining core properties of the mind

Perspectives on Aspect Henk J. Verkuyl, Henriette De Swart, Angeliek Van Hout, 2006-01-17 The aim of this book is two fold to offer a retrospective view on the past thirty years of research on aspectuality and temporality as well as to develop new perspectives on the future development of the field Articles contain overviews of the development of the field and or present the state of the art of current research suggesting new and upcoming lines of research An important theme throughout the book is typological variation and the relevance of empirical data for theory formation Together the articles in the book take a wide crosslinguistic scope including aspectual analyses of English and two varieties of English African American English and Colloquial Singapore English Italian French Bulgarian Czech Mandarin Chinese West Greenlandic

Wakashan languages and Nakh Daghestanian languages Audience Scholars and students of aspectuality in semantics and at the syntax semantics interface *Theoretical and Crosslinguistic Approaches to the Semantics of Aspect* Susan Deborah Rothstein, 2008 The papers in this volume investigate the semantics of aspect from both a theoretical and cross linguistic point of view in a wide range of languages from a number of different language families The papers are all informed by the belief that a thorough exposure to the expression of aspect cross linguistically is crucial for progress in understanding how the semantics of aspect and what the semantic basis of aspectual distinctions is The languages discussed include Russian English Dutch Hebrew Mandarin Japanese and Kalaallisut The issues discussed in this volume include the centrality of measuring and counting in an understanding of telicity the importance of the singular plural distinction in the study of aspect the importance of homogeneity as a property of event types the flexibility of lexical classes and the interaction between expressions of aspect and the particular morphosyntactic structure of a language **Aspect in English** K.

Kabakciev, 2013-03-09 Based on an earlier edition published in 1992 in Bulgarian this book offers a specific approach to one of the most controversial problems in linguistics According to it aspect is the result of a subtle and complex interplay between the referents of verbs and nouns in the sentence Special attention is paid to the role nouns and noun phrases play in the explication of aspect in English and similar languages The grammatical marking of aspect is shown to be a compensatory phenomenon imposed by language structure Comparisons made using Slavic mainly Bulgarian data reveal that compositional aspect is a mirror image of verbal aspect When explicated compositionally aspect is also determined by pragmatic factors Ultimately it is part of man's cognitive potential **The Syntactic Nature of Inner Aspect** Jonathan E.

MacDonald, 2008-11-27 This book explores the syntactic nature of inner aspect from a minimalist perspective It begins with the new observation that there are two independent properties at play in English inner aspect the object to event mapping and event structure From a discussion of English statives and Russian it is concluded that the former property is variant and the latter universal a minimalist conception of language variation arises naturally in this context Additionally an exploration of a lexical derivational approach to achievements leads to the expectation that there are no accomplishments in the lexicon A detailed look at idioms suggests that this expectation is met These results support the division of labor between an operative lexicon and narrow syntax in aspectual composition this naturally poses a problem for neo constructional approaches to inner aspect Finally one conclusion reached about the syntactic nature of inner aspect regards the object to event mapping it is a purely syntactic phenomenon **On the Compositional Nature of Stativity** E. Matthew

Husband, 2010 Since at least Verkuyl 1972 aktionsart has been considered a property of phrasal configurations minimally resulting from a combination of a predicate and its internal argument This has been demonstrated most clearly in the literature on telicity where certain predicate argument configurations allow for a telic interpretation while others permit only an atelic interpretation The properties shared by nominals and events and the manner of their composition has been the

source of much debate leading to a rich literature on the composition of events Largely left out of this debate however has been the role that arguments might play if any at all in the composition of states This dissertation explores the role arguments and predicates play in determining the availability of an existential interpretation of a stative subject one property distinguishing between the stage level and individual level behavior of predicates It develops a theory of aktionsart in which quantization the opposition of quantized and homogeneous structures plays a central role in determining the aspectual behavior of stative predicates It argues that the distinction between stage level and individual level states is determined compositionally taking into account properties of the predicate both verbal and adjectival and its arguments I begin by observing two empirical puzzles which affect the availability of existential interpretation the effects of internal arguments in verbal statives first observed in Fernald 1994 and the scale structure effects of adjectival predicates Pursuing an analogy between the availability of existential interpretation in states and telicity in events I explore the possible role verbs in stative predicates play in determining the existential interpretation of their subject ultimately arguing that there are no individual level or stage level verbs I then turn to the role played by verbal arguments in stative predicates I propose in opposition to topic comment theories of the internal argument effects that the quantization of the object of transitive stative verbs determines whether they license an existential interpretation of their subject Predicates with quantized objects license an existential interpretation while those with homogeneous objects do not Given the structural analogy between the availability of existential interpretation and telicity I propose that stative and eventive predicates are composed by the same mechanisms with the distinction between states and events arising from the selectional restrictions on Voice following Kratzer 1996 2004 I then turn to adjectival predicates and the observation that their scale structure influences the availability of existential interpretation I demonstrate that scale structure is a type of quantization closed scales are quantized open scales are homogeneous and argue that this compositionally determines their stage level individual level behavior I further consider the role arguments play in determining the availability of existential interpretation observing that as with telicity the quantization of arguments affects a predicate s stage level individual level behavior The dissertation closes with an overview of its content and presents a highly speculative discussion on the role played by quantization in language and the possible role it may play in vision suggesting that quantization may be a core component of cognition more generally The dissertation citations contained here are published with the permission of ProQuest llc Further reproduction is prohibited without permission Copies of dissertations may be obtained by Telephone 800 1 800 521 0600 Web page <http://www.proquest.com/en-US/products/dissertations/individuals.shtml> *Aspect in Grammatical Variation* James Anthony Walker, 2010 The articles in this edited volume represent a range of approaches to studying the role of verbal aspect in grammatical variation Issues addressed include defining the variable context operationalizing aspectual distinctions as factors conditioning linguistic variation and the appropriate number of aspectual distinctions and levels Apart from bringing to light various methodological

and analytical issues this volume gathers together a unique collection of original research based on spoken and written language corpora of an array of languages and linguistic varieties African American Vernacular English Caribbean English and English based creole Indian English Newfoundland English Canadian French Brazilian Portuguese Ecuadorian Spanish Mexican Spanish and Peninsular Spanish This volume should not only benefit research on grammatical variation but also be of interest more generally to the study of verbal aspect

The Compositional Nature of Tense, Mood and Aspect: Volume 167 Henk J. Verkuyl, 2021-10-14 Bringing together fifty years worth of cross linguistic research this pioneering monograph explores the complex interaction between tense mood and aspect It looks at the long way of combining elementary semantic units at the bottom of phrase structure up to and including the top of a sentence Rejecting ternary tense as blocking compositionality it introduces three levels obtained by binary tense oppositions It also counters an outdated view on motion by assuming that change is not expressed as having an inherent goal but rather as dynamic interaction between different number systems that allows us to package information into countable and continuous units It formally identifies the central role of a verb in a variety of argument structures and integrates adverbial modifiers into the compositional structure at different tense levels of phrase structure This unique contribution to the field will be essential reading for advanced students and researchers in the syntax semantics interface

Tense, aspect and mood in first and second language acquisition Emmanuelle Labeau, Inès Saddour, 2012-01 Tense aspect and mood have attracted much attention in the areas of both first and second language acquisition but scholars in the two disciplines often fail to learn from each other Western European languages have also been the focus of most studies but there would be lessons to learn from less studied

languages This volume offers new insights on tense aspect and mood by bringing together the findings of first and second language acquisition and comparing child and adult monolingual and multilingual learning processes that are approached from various theoretical points of view In addition it spans over a wide range of less studied languages Bulgarian Hebrew Korean Russian and Western European languages are studied from new angles **Mood, Aspect, Modality Revisited** Joanna Blaszczak, Anastasia Giannakidou, Dorota Klimek-Jankowska, Krzysztof Migdalski, 2017-01-12 Over the past several decades linguistic theorizing of tense aspect and mood TAM along with a strongly growing body of crosslinguistic studies has revealed complexity in the data that challenges traditional distinctions and treatments of these categories Mood Aspect Modality Revisited argues that it's time to revisit our conventional assumptions and reconsider our foundational questions What exactly is a linguistic category What kinds of categories do labels such as subjunctive imperative future and modality truly refer to In short how categorical are categories Current literature assumes a straightforward link between grammatical category and semantic function and descriptions of well studied languages have cultivated a sense of predictability in patterns over time As the editors and contributors of Mood Aspect Modality Revisited prove however this predictability and stability vanish in the study of lesser known patterns and languages The ten provocative essays gathered here present fascinating cutting edge research demonstrating that the traditional grammatical distinctions are ultimately fluid and perhaps even illusory Developing groundbreaking and highly original theories the contributors in this volume seek to unravel more general fundamental principles of TAM that can help us better understand the nature of linguistic representations

The Parameter of Aspect C.S. Smith, 2012-12-06 While working on this project I have received institutional support of several kinds for which I am most grateful I thank the Institute for Advanced Study at Stanford University and the Spencer Foundation for a stimulating environment in which the basic idea of this book was developed The Max Planck Institute for Psycholinguistics at Nijmegen enabled me to spend several months working on the manuscript A National Science Foundation grant to develop Discourse Representation Theory and a grant from The University Research Institute of the University of Texas also gave me time to pursue this project I thank Helen Aristar Dry for reading early drafts of the manuscript Osten Dahl for penetrating remarks on a preliminary version and my collaborator Gilbert Rappaport for relentless comments and questions throughout People with whom I have worked on particular languages are mentioned in the relevant chapters I owe a special debt of gratitude to the members of my graduate seminar on aspect in the spring of 1990 they raised many questions of importance which made a real difference to the final form of the theory I have benefitted from presenting parts of this material publicly including colloquia at the University of California at Berkeley the University of California at San Diego the University of Pennsylvania Rice University the University of Texas and University of Tel Aviv I thank Adrienne Diehr and Marjorie Troutner for their efficient and good humored help throughout the work on the first edition **Word Meaning and Montague Grammar** D. R. Dowty, 2012-12-06 The most general goal of this book is to propose and illustrate

a program of research in word semantics that combines some of the methodology and results in linguistic semantics primarily that of the generative semantics school with the rigorously formalized syntactic and semantic framework for the analysis of natural languages developed by Richard Montague and his associates a framework in which truth and denotation with respect to a model are taken as the fundamental semantic notions I hope to show both from the linguists and the philosophers point of view not only why this synthesis can be undertaken but also why it will be useful to pursue it On the one hand the linguists decompositions of word meanings into more primitive parts are by themselves inherently incomplete in that they deal only in distinctions in meaning without providing an account of what meanings really are Not only can these analyses be made complete by a model theoretic semantics but also such an account of these analyses renders them more exact and more readily testable than they could ever be otherwise

The Oxford Handbook of Tense and Aspect Robert I. Binnick, 2012-06-14 This Handbook is a comprehensive authoritative and accessible guide to the topics and theories that current form the front line of research into tense aspect and related areas

Interfaces with English Aspect Debra Ziegeler, 2006-01-01 The field of verbal aspect has been a focus for the derivation of a multiplicity of theoretical approaches ranging over decades of linguistic research From the point of view of recent studies though there has been relatively little emphasis on the nature of the interaction of aspect with other categories and the ways in which our knowledge of aspect acts as a primary semantic contributor to the creation of other basic verbal parameters such as tense and modality This book aims to cross some of the categorial borders using a collection of studies on the interfaces of English aspect with other grammatical domains The studies in the book have been assembled in order to answer two central issues surrounding the nature of English aspect the possibility of the historical co existence of a perfective and imperfective grammatical distinction in English and the derivation of modality as an inference arising out of specific conflicts and combinations of lexical and grammatical aspect In answering these questions a data driven rather than a theory driven approach is favoured and the general principles of Gricean pragmatics and grammaticalisation are applied to a wide range of empirical sources to propose alternative explanations to some long established problems of English historical linguistics and semantics

Aspect and the Categorization of States David Brian Roby, 2009-11-19 In this work the Spanish copulae *ser* and *estar* are argued to be aspectual morphemes Their binary opposition reflects the universal aspectual values Perfective which are the same ones overtly expressed by the preterite and imperfect past tense forms in Spanish It can therefore be shown that different types of states just like different types of events can be categorized based on their aspectual composition Additionally the inherent semantic differences between events and states can be accounted for by analyzing aspect as applying to events internally and to states externally A useful resource for the beginning linguist as well as the most seasoned analyst this work is written in language that is easy to understand while remaining faithful to all of the appropriate relevant technical terminology Anyone who is seriously interested in exploring why the Spanish verbs *ser* and *estar* are used the way they are should read this book

Modeling Biblical Language Stanley E. Porter, Gregory P. Fewster, Christopher D. Land, 2016-03-21 *Modeling Biblical Language* presents articles with some of the latest scholarship applying linguistic theory to the study of the Christian Bible. The contributors are all associated with the McMaster Divinity College Linguistic Circle, a collegial forum for presenting working papers in modern linguistics, especially Systemic Functional Linguistics and biblical studies. The papers address a range of topics in linguistic theory and the Hebrew and Greek languages. Topics include linguistic model building, temporality and verbal aspect, Greek lexical semantics and Hebrew-Greek translation, appraisal and evaluation theory, metaphor theory, corpus linguistics, discourse analysis, and Greek clausal structure. These various areas of linguistic exploration contribute generally to the interpretation and analysis of the Old and New Testaments as well as to linguistic theory proper.
