Eremeev, 1999-02-28 This book is the outcome of a NATO Advanced Research Workshop on The Eastern Mediterranean as a laboratory basin for the assessment of contrasting ecosystems that was held in Kiev Ukraine March 23 27 1998 The scientific rationale of the workshop can be summarized as follows The Eastern Mediterranean is the most nutrient impoverished and oligotrophic large water body known There is a well defined eastward trend in nutrient ratios over the entire Mediterranean that starts at the Gibraltar Straits and through the western basin proceeds to the Ionian and Levantine Seas Supply of nutrients to the entire Mediterranean is limited by inputs from the North Atlantic and various river systems along the sea The unique feature of the Mediterranean is the presence of an eastward longitudinal trend in available nitrate phosphate ratios This apparently induces a west to east variation in the structure of the pelagic food web and trophic interactions In this context the Mediterranean and in particular

its Eastern basin provides probably a unique platform to explore the hypotheses related to the suggested phosphate limitation on production and to the shift between microbial and classical modes of operation of the photic food web. The major exception of the overall oligotrophic nature of the Eastern Mediterranean is the highly eutrophic system of the Northern Adriatic Sea. Here during the last two decades the discharges of the northern rivers especially of the Po together with municipal sewage have led to a very marked increase of nutrients and subsequent imponent eutrophication events.

Earth System Science: Bridging the Gaps between Disciplines Gerrit Lohmann, Klaus Grosfeld, Dieter Wolf-Gladrow, Vikram Unnithan, Justus Notholt, Anna Wegner, 2012-11-06 Earth system science is traditionally split into various disciplines: Geology, Physics, Meteorology, Oceanography, Biology, etc. and several sub-disciplines. Overall, the diversity of expertise provides a solid base for interdisciplinary research. However, gaining holistic insights into the Earth system requires the integration of observations, paleoclimate data analysis tools, and modeling. These different approaches of Earth system science are rooted in various disciplines that cut across a broad range of timescales. It is therefore necessary to link these disciplines at a relatively early stage in PhD programs. The linking of data and modeling as it is the special emphasis in our graduate school enables graduate students from a variety of disciplines to cooperate and exchange views on the common theme of Earth system science, which leads to a better understanding of processes within a global context.

Ocean Optics, 1994 **Laser Techniques for Fluid Mechanics** R.J. Adrian, Diamantino Durao, M.V. Heitor, M. Maeda, Cameron Tropea, J.H. Whitelaw, 2002-03-26 This volume includes revised and extended versions of selected papers presented at the Tenth International Symposium on Applications of Laser Techniques to Fluid Mechanics held at the Calouste Gulbenkian Foundation in Lisbon during the period of July 10 to 13, 2000. The papers describe instrumentation developments for Velocity, Scalar, and Multi-Phase Flows and results of measurements of Turbulent Flows and Combustion and Engines. The papers

demonstrate the continuing and healthy interest in the development of understanding of new methodologies and implementation in terms of new instrumentation The prime objective of the Tenth Symposium was to provide a forum for the presentation of the most advanced research on laser techniques for flow measurements and communicate significant results to fluid mechanics The application of laser techniques to scientific and engineering fluid flow research was emphasized but contributions to the theory and practice of laser methods were also considered where they facilitate new improved fluid mechanic research Attention was placed on laser Doppler anemometry particle sizing and other methods for the measurement of velocity and scalars such as particle image velocimetry and laser induced fluorescence
