Physicalism And Mental Causation:

Physicalism and Mental Causation Sven Walter, Heinz-Dieter Heckmann, 2015-11-04 Physicalism the thesis that everything there is in the world including our minds is constituted by basic physical entities has dominated the philosophy of mind during the last few decades But although the conceptual foundations of the physicalist agenda including a proper explication of notions such as causation determination realization or even physicalism itself must be settled before more specific problems e.g. the problems of mental causation and human agency can be satisfactorily addressed a comprehensive philosophical reflection on the relationships between the various key concepts of the debate on physicalism is yet missing This book presents a range of essays on the conceptual foundations of physicalism mental causation and human agency written by established and leading authors in the field

Mind in a Physical World Jaegwon Kim, 2000 This book based on Jaegwon Kim's 1996 Townsend Lectures presents the philosopher's current views on a variety of issues in the metaphysics of the mind in particular the mind body problem mental causation and reductionism This book based on Jaegwon Kim's 1996 Townsend Lectures presents the philosopher's current views on a variety of issues in the metaphysics of the mind in particular the mind body problem mental causation and reductionism Kim construes the mind body problem as that of finding a place for the mind in a world that is fundamentally physical Among other points he redefines the roles of supervenience and emergence in the discussion of the mind body problem Arguing that various contemporary accounts of mental causation are inadequate he offers his own partially reductionist solution on the basis of a novel model of reduction Retaining the informal tone of the lecture format the book is clear yet sophisticated

Minds, Causes and Mechanisms Josep E. Corbí, Josep L. Prades, 2000-02-21 Minds Causes and Mechanisms questions the internal consistency of causal physicalism and vindicates a novel approach to mental causation

Physicalism and Mental Causation Sven Walter, 2004

Qualia and Mental Causation in a Physical World Terry Horgan, Marcelo Sabates, David Sosa, 2015-03-05 A collection of new essays that develop themes from the work of the philosopher Jaegwon Kim

Mental Causation and Ontology S. C. Gibb, E. J. Lowe, R. D. Ingthorsson, 2013-03-21 This book demonstrates the importance of ontology for a central debate in philosophy of mind Mental causation seems an obvious aspect of the world But it is hard to understand how it can happen unless we get clear about what the entities involved in the process are An international team of contributors presents new work on this problem

Mental Causation and Physicalism: , 1997

Physicalism, or Something Near Enough Jaegwon Kim, 2007-12-03 Contemporary discussions in philosophy of mind have largely been shaped by physicalism the doctrine that all phenomena are ultimately physical Here Jaegwon Kim presents the most comprehensive and systematic presentation yet of his influential ideas on the mind body problem He seeks to determine after half a century of debate What kind of or how much physicalism can we lay claim to He begins by laying out mental causation and consciousness as the two principal challenges to contemporary physicalism How can minds exercise their causal powers in a physical world Is a physicalist account of

consciousness possible The book's starting point is the supervenience argument sometimes called the exclusion argument which Kim reformulates in an extended defense This argument shows that the contemporary physicalist faces a stark choice between reductionism the idea that mental phenomena are physically reducible and epiphenomenalism the view that mental phenomena are causally impotent Along the way Kim presents a novel argument showing that Cartesian substance dualism offers no help with mental causation Mind/body reduction therefore is required to save mental causation But are minds physically reducible Kim argues that all but one type of mental phenomena are reducible including intentional mental phenomena such as beliefs and desires The apparent exceptions are the intrinsic felt qualities of conscious experiences qualia Kim argues however that certain relational properties of qualia in particular their similarities and differences are behaviorally manifest and hence in principle reducible and that it is these relational properties of qualia that are central to their cognitive roles The causal efficacy of qualia therefore is not entirely lost According to Kim then while physicalism is not the whole truth it is the truth near enough

Can Physicalism Do Justice to Mental Causation? William Joseph Cooper, Jaegwon Kim, Donald Davidson, Alexander Miller, Jordi Fernandez, Peter Menzies, 2007

Qualia and Mental Causation in a Physical World Terry Horgan, Marcelo Sabates, David Sosa, 2015 How does mind fit into nature Philosophy has long been concerned with this question No contemporary philosopher has done more to clarify it than Jaegwon Kim a distinguished analytic philosopher specializing in metaphysics and philosophy of mind With new contributions from an outstanding lineup of eminent scholars this volume focuses on issues raised in Kim's work The chapters cluster around two themes first exclusion supervenience and reduction with attention to the causal exclusion argument for which Kim is widely celebrated and second phenomenal consciousness and qualia with attention to the prospects for a functionalist account of the mental This volume is sure to become a major focus of attention and research in the disciplines of metaphysics and philosophy of mind

Qualia and Mental Causation in a Physical World Terry Horgan, David Sosa, Marcelo Sabates, 2015

God and Mental Causation Daniel Lim, 2015-06-15 This book lies at the intersection of philosophy of mind and philosophy of religion and operates on the assumption that dialogue between the two disciplines can be fruitful In particular it focuses on how debates in the philosophy of mind regarding the nature of mental causation relate to debates in the philosophy of religion regarding divine action creaturely causation and existence of God The book is divided into two parts The first deals with Jaegwon Kim's so-called Supervenience Argument SA against non-reductive physicalism One important observation is that the structural similarities between non-reductive physicalism and orthodox theism make it convenient to co-opt non-reductive physicalist solutions to the SA in defending the possibility of creaturely causation in the philosophy of religion The SA is used as a foil to discuss the relative merits of Malebranche's so-called Conservation is Continuous Creation Argument for Occasionalism CCCA Moreover the so-called compatibilist strategy Karen Bennett 2003 2009 for developing a non-reductive physicalist response to the Supervenience Argument is defended and developed This strategy is then deployed in

the philosophy of religion to defend the possibility of creaturely causation against the CCCA **The Argument from Reason and the Problem of Mental Causation** Joseph A. Baltimore, 2007 **Physicalism Deconstructed** Kevin Morris, 2019 Provides a philosophical and historical critique of contemporary conceptions of physicalism especially non reductive levels based approaches to physicalist metaphysics Challenging assumptions about the mind body problem this accessible book will interest scholars working in metaphysics philosophy of mind and philosophy of science *Philosophy of the Brain* Georg Northoff, 2004 What is the mind What is the relationship between brain and mind These are common questions But What is the brain is a rare question in both the neurosciences and philosophy The reason for this may lie in the brain itself Is there a brain problem In this fresh and innovative book Georg Northoff demonstrates that there is in fact a brain problem He argues that our brain can only be understood when its empirical functions are directly related to the modes of acquiring knowledge our epistemic abilities and inabilities Drawing on the latest neuroscientific data and philosophical theories he provides an empirical epistemic definition of the brain Northoff reveals the basic conceptual confusion about the relationship between mind and brain that has so obstinately been lingering in both neuroscience and philosophy He subsequently develops an alternative framework where the integration of the brain within body and environment is central This novel approach plunges the reader into the depths of our own brain The Philosophy of the Brain that emerges opens the door to a fascinating world of new findings that explore the mind and its relationship to our very human brain Series A

Essays in the Metaphysics of Mind Jaegwon Kim, 2010-10-21 The first begins with a consideration of Davidson s argument for the claim that there are no strict laws about the mental the second builds on J J C Smart s observations on biology and its relation to physics and the third is based on my earlier work on multiple realization **Causation and Mental Causation** Raffaella Campaner, Carlo Gabbani, 2016 **The Oxford Handbook of Philosophy of Mind** Brian McLaughlin, Ansgar Beckermann, Sven Walter, 2009-01-15 This is the most authoritative and comprehensive guide ever published to the state of the art in philosophy of mind a flourishing area of research An outstanding team of contributors offer 45 new critical surveys of a wide range of topics **The Conceptual Link from Physical to Mental** Robert Kirk, 2013-01-31 How are truths about physical and mental states related Robert Kirk articulates and defends redescriptive physicalism a fresh approach to the connection between the physical and the mental which answers the problems that mental causation has traditionally raised for other non reductive views *Can Non-reductive Physicalism Save Mental Causation?* Wai Kin Wong, 2012
