Power In Language Verbal Communication And Social Influence Language And Language Behavior:

Power in Language Sik H. Ng, James J. Bradac, 1993-05-25 This volume is a comprehensive analysis of research and theory on verbal communication and social influence. It examines a variety of empirical studies, theoretical positions, methodological matters, and substantive issues pertaining to the use of language for generating influence and control. It moves from the basic concept of monological speech and the achievement of power to the increasingly complex and subtle cases of conversational control and linguistic depoliticization. Topics such as linguistic signs of power, language as a resource for creating power, and social causes of verbal power are examined in contexts ranging from informal conversations to newspaper headlines. Intergroup Cognition and Intergroup Behavior Constantine Sedikides, John Schopler, Chester A. Insko, Chester Insko, 2013-02-01 Social psychology has maintained a keen interest over the years in issues related to intergroup behavior such as ingroup favoritism and discrimination. The field has also been preoccupied with ways to reduce prejudice and discrimination. Intergroup contact has been offered as the main mechanism for prejudice and discrimination reduction. In the last 15 years, the social cognitive perspective has been applied to the study of intergroup relations. Theoretical advances have been made regarding such issues as the representation of information about ingroup and outgroup members, the structural properties of stereotypes, the relation between cognitive representation and judgment, and the ways in which cognition, affect, and motivation interactively influence the perception, judgment, and memory of ingroup and outgroup members. The first volume in this new series, this book seeks to bring the above two traditions together. Focusing on the interplay between cognition and behavior in intergroup settings, it addresses four general questions: How does intergroup cognition, perceptions, judgments, and memories influence intergroup behavior, ingroup favoritism, and discrimination? How does intergroup behavior subsequently change intergroup cognition? What is the mediational role of affect, motivational processes, and social context? How effective can change in intergroup cognition be in altering intergroup behavior? This volume focuses not on a specific theory but rather on an approach. This approach is the interface between intergroup cognition and intergroup behavior. The various contributors are leading investigators in these areas and share the belief that the field has reached a level of maturity where it can start asking the hard questions regarding the complex and

multifaceted ways in which intergroup cognition and behavior are related The investigators do not just summarize their work Instead they connect aspects of their work to the theme of the volume and integrate their work with existing approaches in the relevant literature

Small Talk Justine Coupland, 2014-06-11 This study presents a new perspective on small talk and its crucial role in everyday communication. Handbook of Neurosociology David D. Franks, Jonathan H. Turner, 2012-07-09 Until recently, a handbook on neurosociology would have been viewed with skepticism by sociologists who have long been protective of their disciplinary domain against perceived encroachment by biology. But a number of developments in the last decade or so have made sociologists more receptive to biological factors in sociology and social psychology. Much of this has been encouraged by the coeditors of this volume, David Franks and Jonathan Turner. This new interest has been increased by the explosion of research in neuroscience on brain functioning and brain-environment interaction via new MRI technologies with implications for social and psychological functioning. This handbook emphasizes the integration of perspectives within sociology as well as between fields in social neuroscience. For example, Franks

represents a social constructionist position following from G H Mead's voluntaristic theory of the act while Turner is more social structural and positivistic Furthermore this handbook not only contains contributions from sociologists but leading figures from the psychological perspective of social neuroscience
