Radiation Sensitizers:

Radiation Sensitizers N. G. Huilgol, Nagraj G. Huilgol, C. K. K. Nair, V. T. Kagiya, 2001 In spite of years of clinical research and trials of a variety of new and promising therapies cancer remains as a major cause of morbidity and mortality Use of ionizing radiation in treatment of cancer quickly followed the discovery of X rays and radioactivity at the dawn of the last century The limited success of radiotherapy has been attributed to several factors if which the intrinsic radioresistance of tumor cells their fast reproduction and tumor hypoxia are the major causes Radiation Sensitizers A Contemporary Audit presents data on newer hypoxic cell sensitizers like senazole and deal with old molecules such as chlorpromazine in a new role of sensitization Bringing together information scattered throughout published and unpublished literature the book contains contributions from an international panel that examines new therapies and new uses of old therapies It contains tables and diagrams that illustrate the concepts and make the information easy to find *Perez and Brady's Principles and Practice of Radiation Oncology* Edward C. Halperin, Carlos A. Perez, Luther W. Brady, 2008 The thoroughly updated fifth edition of this landmark work has been extensively revised to better represent the rapidly changing field of radiation oncology and to provide an understanding of the many aspects of radiation oncology This edition places greater emphasis on use of radiation treatment in palliative and supportive care as well as therapy Radiation Sensitizers, Their Use in the Clinical Management of Cancer Luther W. Radiosensitizers and Radiochemotherapy in the Treatment of Cancer Shirley Lehnert, 2014-12-08 Radiosensitizers and Radiochemotherapy in the Treatment of Cancer catalogs and describes the mechanism of action for entities characterized as radiosensitizers Developments in the biological and physical sciences have introduced new radiosensitizers and defined novel targets for radiosensitization As a result a book about radiosensitization must now address a huge range of topics covering everything from molecular oxygen and high Z elements to monoclonal antibodies and complex phytochemicals At the molecular level the understanding of the molecular consequences of DNA damage and the DNA damage response have informed the development of targeted radiosensitizers and shed light on the mode of action of radiochemotherapy protocols of known clinical efficacy In this book the mechanisms of action at the molecular and cellular level are described for documented radiosensitizers including where applicable a brief history of their clinical use and most recent clinical results In addition the clinical context is addressed including the importance of factors such as dose and dose rate normal tissue toxicity and drug delivery Intuitively organized by topic and application the book includes extensive illustrations end of chapter summaries and a wealth of references

Radiobiology Kedar N. Prasad, 2020-08-18 This handbook presents the most current information on the effects of ionizing radiation on mammalian cells with emphasis on human tissues The dose effect relationship is emphasized in a quantitative manner The book contains up to date data on the late effects of low levels of radiation on humans It also provides some of the late consequences of radiation therapy detected among cancer survivors

Advanced Topics on Radiosensitizers of Hypoxic Cells A. Breccia, 2012-12-06 In July 1979 the Faculty of Pharmacy of the University of Bologna received a proposal from Professor Breccia to hold an International Conference on Nitroimidazoles Chemistry Pharmacology and Clinical Application Because of the great interest in these drugs in various fields I was very pleased to accept the proposal and to give the conference the sponsorship of the University of Bologna It was an added pleasure to accept the chairmanship of the meeting together with Professors Sensi and Adams At the same time the Minister of Education approved a proposal which also came from the Faculty of Pharmacy to offer an advanced course on the topic Radiosensitizers of Hypoxic Cells This course was subsequently approved by a special Committee of the NATO Scientific Programme as an Advanced Study Institute Since the subject matter of both the conference and the course are closely inter related it was logical to plan the conference as part of the overall course Bringing together specialists from quite different and apparently unrelated fields of research but all with an interest in the study and application of one single group of drugs is a novel idea with intriguing possibilities The volumes of the proceedings include contributions from experts with such diverse interests as synthetic chemistry mechanism of drug action parasitology anaerobic bacteria and protozoa pharmacology and toxicology radiation sensitizers for use in radiotherapy and the development of drugs for use in cancer in general

Radiobiology in Radiotherapy Norman M. Bleehen, 2012-12-06 The ninth

annual multidisciplinary symposium on clinical oncology organized by the Royal College of Radiologists was jointly arranged with the International Society for Radiation Oncology. It was held in London in February 1987 and discussed the biological and clinical basis of the effects of radiotherapy. Wherever possible lectures by an experimental scientist were paired with those of a clinical scientist in order to emphasize clinical relevance. It is hoped that this has resulted in a widely balanced view of the subject. The volume presents an updated version of these subjects based on those talks. After surgery radiotherapy is the main treatment used in the management of patients with cancer. Its empirical success when first introduced is now backed up by a wealth of laboratory clinical and experimental experience. New techniques for administering the conventional X-ray therapy have been supplemented by methods which can be used to modify the radiation response. These include changes in dose rate or fractionation and combined modality treatments including sensitization by drugs or heat. Other types of radiation such as neutrons and other particles are also now available which have enhanced physical and biological advantages. **Nuclear Science Abstracts**, 1976 Cumulated Index Medicus, 1975 Director's Report and Annual Plan for FY ..., National Cancer Program National Cancer Institute (U.S.), 1983 Therapeutic Ribonucleic Acids in Brain Tumors Volker A. Erdmann, Guido Reifenberger, Jan Barciszewski, 2009-08-11. In the past few years nucleic acids technologies have grown into a powerful analytical and also increasingly therapeutic tool. It has been applied not only to the uncovering of gene functions in many organisms but also to pathogenetic analysis and recently also for the treatment of human diseases. The book discusses in depth the potential of these innovative methods in the broad field of central nervous system and brain tumours particularly. Whereas there is currently no comprehensive overview on potential and challenges of nucleic acids technologies for basic brain tumours and for the clinical management of patients with brain tumours this book does explicitly cover the many other aspects of the RNA World pathogenic and therapeutic potential of microRNAs aptamer technology etc too. With this significantly broadened scope as compared to currently existing books it appears to be an urgently needed new publication. Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70.

Adrenal and Endocrine Tumors in Children G. Bennett Humphrey, Gerald B. Grindey, Louis P. Dehner, Ronald T. Acton, Theodore J. Pysher, 2012-12-06. Adrenal and Endocrine Tumors in Children is the third volume in the series Cancer Treatment and Research devoted to pediatric oncology. Like its predecessors it is organized into two sections. The first section again deals with issues of basic research germane to the understanding of childhood malignancies. In volume 3 the scope of the first section has been broadened to include a review that is epidemiologically oriented and a second review that is psychologically oriented. In the second part major pediatric oncology units in Japan, Australia, Europe and the Americas have been invited to report their experience with the multiple endocrine adrenal cortical carcinomas and the presentation neoplasia syndromes in children. In addition to these institutional reports of case material there are reviews on genetics pathology and a diagnostic evaluation of children. The overview chapter on adrenal cortical carcinoma includes
