unlock the dreaming mind's transformative and intuitive powers. These are the practices used by ancient prophets, seers, and sages to control dreams and visions. Shainberg draws upon the ancient Sephardic Kabbalah tradition as well as illustrative stories and myths from around the Mediterranean to teach readers how to harness the intuitive power of their dreaming. While the Hebrew Bible and our Western esoteric tradition give us ample evidence of dream teachings, rarely has the path to becoming a conscious dreamer been articulated. Shainberg shows that dreaming is not something that merely takes place while sleeping; we are dreaming at every moment. By teaching the conscious mind to be awake in our sleeping dreams and the dreaming mind to be manifest in daytime awareness, we are able to achieve revolutionary consciousness. Her inner vision exercises initiate creative and transformative images that generate the pathways to self-realization. **Excursions to the**

Far Side of the Mind Howard Rheingold, 2012-04-21. Renowned for exploring the social implications of modern technology, Howard Rheingold has been dubbed by MIT the first citizen of the Internet. In this collection of funny, prescient, thought-provoking essays originally published during the 1970s and 1980s, he offers a glimpse into the changes wrought during that explosive period. From the effects of the graphic user interface GUI not only on how we work but how we think to technarchist movements that presaged both the hacker mentality and the anarchist idealism of Burning Man today to a ground-floor view of the very earliest of what Rheingold was the first to dub virtual communities, his *Excursions* run the gamut from the silly to the profound. These essays remain fascinating, amusing, and relevant. Most of my work in recent decades, Rheingold says, has focused on the consequences of digital media and networked publics. Before the digital wave came along, I wrote about a more diverse range of subjects: What causes anger? What's it like to be in a car crash? What's insect sex like? Do invisible airborne chemicals affect behavior? Can we control our dreams? How will people get high in the future? Will money evolve into new forms? In the second decade of the twenty-first century, these short pieces represent my explorations during my think-about anything years to a wider public who may be familiar with my work on digital culture.
