Radie Britain A Bio Bibliography:

Radie Britain Walter B. Bailey, Nancy Gisbrecht Bailey, 1990-03-20 Radie Britain A Bio Bibliography is a concise biography which summarizes the major events in the prolific American composer's life and describes the conditions under which her singular talent emerged. An in depth interview with Britain herself gives the opportunity to hear her own personal thoughts on her life, music and creative philosophy. Walter and Nancy Bailey give an exhaustive list of works and performances each accompanied by significant information on the work or documented performance. Also included are Britain's compositions for orchestra and band, chamber ensemble, solo piano, piano duets, the harp, chorus and solo voice as well as her stage works. Authorized by Miss Britain and compiled with her help, this is a comprehensive guide to the work of a gifted musician. A bibliography of Britain's writings concludes the text along with reviews of her performances and other press materials. With its chronological arrangement, this bibliography traces Britain's musical evolution much like a second biography. An index to the entire volume is provided. Both chronological and alphabetical lists of works can be found in the appendixes.

The Cambridge Companion to Schoenberg Jennifer Shaw, Joseph Auner, 2010-05-13 Arnold Schoenberg composer theorist teacher painter and one of the most important and controversial figures in twentieth century music This Companion presents engaging essays by leading

scholars on Schoenberg's central works, writings and ideas over his long life in Vienna, Berlin and Los Angeles. Challenging monolithic views of the composer as an isolated elitist, the volume demonstrates that what has kept Schoenberg and his music interesting and provocative was his profound engagement with the musical traditions he inherited and transformed with the broad range of musical and artistic developments during his lifetime. He critiqued and incorporated and with the fundamental cultural, social and political disruptions through which he lived. The book provides introductions to Schoenberg's most important works and to his groundbreaking innovations, including his twelve-tone compositions. Chapters also examine Schoenberg's lasting influence on other composers and writers over the last century.

Choral Music in the Twentieth Century Nick Strimple, 2005-11 Musical works for chorus are among the great masterpieces of 20th-century art. This guide, the first truly comprehensive volume on the choral music of the last century, covers the spectacular range of music for vocal ensembles from Saint-Saëns to Tan Dun. The book will be essential to every choral conductor and a valuable resource for choir members, choral societies and choruses.

Cecilia Reclaimed Susan C. Cook, 1994 Cecilia, a fifteenth-century Christian martyr, has long been considered the patron saint of music. In this pathbreaking volume, ten of the best-known scholars in the newly emerging field of feminist musicology explore both how gender has helped shape genres and works of music and how music has contributed to prevailing notions of gender. The musical subjects include concert music, both instrumental and vocal, and the vernacular genres of ballads, salon music and contemporary African American rap. The essays raise issues not only of gender but also of race and class, moving among musical practices of the courtly ruling class and the elite discourse of the twentieth-century modernist movement to practices surrounding marginal girls in Renaissance Venice and the largely white middle-class experiences of magazine and balladry.

The Sonneck Society Bulletin, 1991

The Woman Composer Jill Halstead, 2017-07-05 Unlike previous anthologizing examinations of women and musical composition, this book concentrates on the reasons why there have been and continue to be so few women composers. Jill Halstead focuses on the experiences of nine composers born in the twentieth century: Avril Coleridge-Taylor, Grace Williams, Elizabeth Maconchy, Minna Keal, Ruth Gipps, Antoinette Kirkwood, Enid Luff, Judith Bailey and Bryony Jagger, to explore the physiological, social and political factors that have inhibited women from pursuing careers as composers. Is there a biological argument for inferior female creativity? Do social structures such as marriage serve to restrict potential women composers? Is the gender of a composer reflected in the music they write? If so, how would this manifest itself? The conclusions that are reached are as complex and challenging as the questions that are raised. This powerful and provocative book aims to open up debate on these issues, which have all too often been avoided by critics and musicologists whose writings have perpetuated arguments that denigrate women's ability to compose. By confronting these arguments, this study will hopefully begin a reassessment of attitudes towards women and music so that women composers are less of a rarity by the end of the next century.
