Household Horror Marc Olivier,2020-02-11

A scholar examines 14 everyday objects featured in horror films and how they manifest their power and speak to society's fears. Take a tour of the house where a microwave killed a gremlin, a typewriter made Jack a dull boy, a sewing machine fashioned Carrie's prom dress, and houseplants might kill you while you sleep. In *Household Horror* Marc Olivier highlights the wonder, fear, and terrifying dimension of objects in horror cinema. Inspired by object-oriented ontology and the nonhuman turn in philosophy, Olivier places objects in film on par with humans, arguing, for example, that a sleeper sofa is as much the star of *Sisters* as Margot Kidder. That *The Exorcist* is about a possessed bed and that *Rosemary's Baby* is a conflict between herbal shakes and prenatal vitamins. *Household Horror* reinvigorates horror film criticism by investigating the unfathomable being of objects as seemingly benign as remotes, radiators, refrigerators, and dining tables. Olivier questions what Hitchcock's *Psycho* tells us about shower curtains. What can we learn from Freddie Krueger's greatest accomplice, the mattress? Room by room, Olivier considers the dark side of fourteen household objects to demonstrate how the objects in these films manifest their own power and connect with specific cultural fears and concerns. Provides a lively and highly original contribution to horror studies. As a work on cinema, it introduces the reader to films that may be less well known to casual fans and scholars; more conspicuously, it returns to horror staples gleefully reanimating works that one might otherwise assume had been critically done to death: *Psycho*, *The Exorcist*, *The Shining*. INTELLIGENCE AND MACHINE LEARNING Discover the impact that new technologies are having on communication systems with this up-to-date and one-stop resource. *Communication Networks and Service Management in the Era of Artificial Intelligence and Machine Learning* delivers a comprehensive overview of the impact of artificial intelligence (AI) and machine learning (ML) on service and network management. Beginning with a fulsome description of ML and AI, the book moves on to discuss management models, architectures, and frameworks. The authors also explore how AI and ML can be used in service management functions like the generation of workload profiles, service provisioning, and more. The book includes a handpicked selection of applications and case studies, as well as a treatment of emerging technologies the authors predict could have a significant impact on network and service management in the future. Statistical analysis and data mining are also discussed, particularly with respect to how they allow for an improvement of the management and security of IT systems and networks. Readers will also enjoy topics like: A thorough introduction to network and service management, machine learning, and artificial intelligence. An exploration of artificial intelligence and machine learning for management models.

Burn,2012-12-06 As we stated in our message in the book of abstracts for this congress we have planned the programme over a long period with one clear objective to present musculoskeletal medicine as an integral part of orthodox medical practice rather than as something alternative or complementary To this end we have based the plenary programme as far as possible on accepted epidemiological anatomical physiological and pathological phenomena Scientifically well validated material must surely be the base upon which any viable musculoskeletal medicine practice may be built While we have chosen the plenary programme to reflect musculoskeletal medicine as a part of orthodoxy we realize and wish to emphasize that there is a wealth of original work that has been carried out within FIMM For this reason our first innovation for the congress was to invite members of the scientific advisory committee to select for a directed programme the three topics they felt were of
