The technical complexities of C-14 dating can battle archaeologists.

This book attempts their rescue. It is by specialists for non-specialists.

The realisation that the production rate of C-14 in the atmosphere was not constant undermined the assumption that C-14 years could be equated with calendar years.

Correction by calibration with cross-dated tree-ring radio-carbon samples offers hope, but creates 'correction curves' of bewildering variety.

This book explains the issues clearly and simply, provides valuable comparative data, assesses the reliability of the methods, tells how to take a sample, and where to send it for dating.

Peter F. Biehl,Olivier P. Nieuwenhuyse,2016-11-23 The subject of climate change could hardly be more timely In Climate and Cultural Change in Prehistoric Europe and the Near East an interdisciplinary group of contributors examine climate change through the lens of new archaeological and paleo environmental data over the course of more than 10 000 years from the Near East to Europe Key climatic and other events are contextualized with cultural changes and transitions for which the authors discuss when how and if changes in climate and environment caused people to adapt move or perish More than this

publication of crucial archaeological and paleo environmental data however the volume seeks to understand the social political and economic significance of climate change as it was manifested in various ways around the Old World Contrary to perceptions of threatening global warming in our popular media and in contrast to grim images of collapse presented in some archaeological discussions of past climate change this book rejects outright societal collapse as a likely outcome Yet this does not keep the authors from considering climate change as a potential factor in explaining culture change by adopting a critical stance with regard to the long standing practice of equating synchronicity with causality and explicitly considering alternative explanations

**The Prehistoric Burial Sites of Northern Ireland** Harry Welsh, June Welsh, 2014-07-28 Much has been written about the history of Northern Ireland but less well known is its wealth of prehistoric sites particularly burial sites from which most of our knowledge of the early inhabitants of this country has been obtained

**Modelling Human-Environment Interactions in and beyond Prehistoric Europe** Samuel Seuru, Benjamin Albouy, 2023-07-25 This book offers insight into the relationship between prehistoric and protohistoric human populations and the world around them It reconstructs key aspects of the palaeoenvironment from large scale drivers of environmental conditions such as climate to

more regional variables such as vegetation cover and faunal communities The volume underscores how computational archaeology is leading the way in the study of past human environment interactions across spatial and chronological scales With the increased availability of high resolution climate models agent based modelling palaeoecological proxies and the mature use of Geographic Information System in ecological modelling archaeologists working in interdisciplinary settings are well positioned to explore the intersection of human systems and environmental affordances and constraints These methodological advancements provide a better understanding of the role humans played in past ecosystems both in terms of their impact upon the environment and in return the impact of environmental conditions on human systems They may also allow us to infer past ecological knowledge and land use patterns that are historically contingent rather than environmentally determined This volume gathers contributions that combine reconstructions of past environments and archeological data with a view to exploring their complex interactions at different scales and invites scholars from varying disciplines and backgrounds to present and compare different modelling approaches      **The Dover Bronze Age Boat** Peter

Clark, 2013-02-15 Tells the dramatic story of the discovery in 1992 of the perfectly preserved remains of a large prehistoric sewn plank boat in Dover a unique find of a boat capable of cross channel sailing It includes carefully researched reconstruction drawings      Radiocarbon Dating R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor's seminal book Radiocarbon Dating An Archaeological Perspective It covers the major advances and accomplishments of the  $^{14}\text{C}$  method in archaeology and analyzes factors that affect the accuracy and precision of  $^{14}\text{C}$  based age estimates In addition to reviewing the basic principles of the method it examines  $^{14}\text{C}$  dating anomalies and means to resolve them and considers the critical application of  $^{14}\text{C}$  data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology This volume again a benchmark for  $^{14}\text{C}$  dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record
