Kangas, 2022-12-26 This book presents a history of radioecology from World War II through to the critical years of the Cold War finishing with a discussion of recent developments and future implications for the field Drawing on a vast array of primary sources the book reviews synthesizes and discusses the implications of the ecological research supported by the Atomic Energy Commission AEC of the United States government from World War II to the early 1970s This was a critical period in the history of ecology characterized by a transition from the older largely descriptive studies of communities of plants and animals to the modern form of the science involving functional studies of energy flow and mineral cycling in ecosystems This transition was in large part due to the

development of radioecology which was a by product of the Cold War and the need to understand and predict the consequences of a nuclear war that was planned but has never occurred The book draws on important case studies such as the Pacific Proving Grounds the Nevada Test Site El Verde in Puerto Rico the Brookhaven National Laboratory and recent events such as the nuclear disasters at Chernobyl and Fukushima By revisiting studies and archived information from the Cold War era this book offers lessons from the history of radioecology to provide background and perspective for understanding possible present day impacts from issues of radiation risks associated with nuclear power generation and waste disposal Post Cold War developments in radioecology will be also reviewed and contrasted with the AEC supported ecology research for further perspectives This book will be of great interest to students and scholars of radioecology environmental pollution environmental technology bioscience and environmental history

**Water and the Rainforest in Malaysian Borneo** Ian Douglas, 2022-01-01 This volume synthesizes and analyzes thirty years of hydrological research in the Danum Valley Conservation Area a lowland dipterocarp rainforest in Sabah Malaysia Ian Douglas explores the role of water in the rainforest ecosystem setting out the ecological climatological and geological context of present day hydrological processes soil erosion and stream sedimentation He emphasizes the role of extreme events and natural disturbances in sediment supplies and the evolution of drainage pathways and explains the pathways of rainfall and stream sediment Douglas then explores the impacts caused by logging the extreme pulses of sedimentation and the effects of log removal and logging road construction examining the effects of major storms in the 20 years after tree harvesting Methods of minimizing logging damage to soils and streams are discussed and the effects on flora and fauna are considered

Engaging Troubling Students Scot Danforth, Terry Jo Smith, 2004-08-07 Danforth and Smith have written an exceptional book on educating troubling students It is a clear alternative to current books on educating children with emotional and behavioral disorders most of which are based on behavioral theories They offer practical guidance well illustrated with stories from their own experiences on collaboration working with families conflict resolution social support for students providing a caring pedagogy and teacher development James L Paul Professor Special Education University of South Florida Truly teaching troubling students means connecting with them in ways that can last a lifetime Teachers are consistently faced with students who behave in disruptive or disrespectful ways These troubling students are frequently disengaged from both academics and the possibility of meaningful relationships with caring adults How can teachers engage these students in instruction and learning as well as the development of trust and personal growth Engaging Troubling Students offers instructional and student support practices grounded in critical constructivism engaging problematic students in the learning process and building strong relationships with them These interactions and relationships can have a profound impact on their emotional well being and learning Danforth and Smith draw from many academic fields to build this comprehensive resource History and roots of current issues and dilemmas Theoretical foundation of critical constructivism Teaching practices designed to

foster the teacher student relationship Specific programs addressing conflict families inclusive education and more Filled with rich narrative and directed to teachers working with troubling students each day this insightful practical guide will help lead you as you develop helpful trusting relationships with them     The Future of Tropical Rain Forests in South East Asia J. Davidson, John Michael Davidson, Tho Yow Pong, Maarten Bijleveld, 1985     Student-originated Studies Projects National Science Foundation (U.S.),     *Student-originated Studies Projects* ,1971 Abstracts of scientific studies dealing with local problems which have immediate relevance to society     Tropical Forest Canopies: Ecology and Management K.E. Linsenmair, Andrew Davis, B. Fiala, M.R. Speight, 2013-03-14 Almost half of all life on earth may exist in the world s forest canopies They may also play a vital role in maintaining the planet s climate yet they remain largely unexplored owing to difficulties of access They are renowned for their great diversity and role in forest functioning yet there are still great gaps in the understanding of this last biological frontier This seminal book shows how canopy science is now in a position to answer many of the outstanding questions among which are some of the most pressing environmental issues society is presently facing It represents a major summary of the current understanding of canopy ecology and maps a path forward into a greater understanding of tropical forest ecology and management at a time when the very future of this ecosystem is threatened by humanity s actions
