The Moving Spotlight Ross P. Cameron,2015-08-20 Ross P Cameron argues that the flow of time is a genuine feature of reality He suggests that the best version of the A Theory is a version of the Moving Spotlight view according to which past and future beings are real but there is nonetheless an objectively privileged present Cameron argues that the Moving Spotlight theory should be viewed as having more in common with Presentism the view that reality is limited to the present than with the B Theory the view that time is just another dimension like space through which things are spread out The Moving Spotlight view on this picture agrees with Presentism that everything is the way it is now it simply thinks that non present beings are amongst the things that are now some way Cameron argues that the Moving Spotlight theory provides the best account of truthmakers for claims about what was or will be the case and he defends the view against a number of objections including McTaggart s argument that the A Theory is inconsistent and the charge that if the A Theory is true but presentism false then we could not know that we are present The Moving Spotlight defends an account of the open future that what will happen is as yet undetermined Land argues that this is a better account than that available to the Growing Block theory

BOOK REVIEWS One thing to be said about Duckhorn s poetry readers get value for their money Duckhorn clearly owes much to Emily Dickinson another woman known for filling books to the brim with brief pieces Sometimes the poet has a fantastic ear for pregnant though mundane symbols as illustrated in The Net Weight of the Chess Set She often seems to have a real knack for phrasing as with the quick sketch Who Can Master Who can chortle in the midst of turmoil Whose open heart be so driven Bend down and kiss the good earth And stay happy when shelter s not given Kirkus Discoveries
