Rainforest Tourism, Conservation and Management Bruce Prideaux,2014-09-19 Globally rainforests are under threat on numerous fronts including clearing for agriculture harvesting for timber and urban expansion Yet they have a crucial role in biodiversity conservation climate change mitigation and providing other ecosystem services As the term is used in this book rainforests include both temperate and tropical although the emphasis is on tropical rainforests Rainforests are also attractive tourist spaces and where they have been used as a tourism resource have generated significant income for local communities However not all use of rainforests as a tourism resource has been sustainable This book argues that sustainability must be the foundation on which tourism use of this complex but ultimately fragile ecosystem must be built upon It provides a multi disciplinary perspective incorporating rainforest science management and tourism issues The book is organized into four sections commencing with Rainforest Ecology and Management followed by People and Rainforests Opportunities for Rainforest Tourism Development and finally Threats to Rainforests Each major rainforest region is covered including the Amazon Central America Africa Australia and south east Asia in the context of a specific issue For example rainforests in Papua New Guinea are examined in the context of community based ecotourism development while the rainforests in Borneo are discussed in an examination of wildlife issues Other issues covered in this manner include governance empowerment issues for rainforest peoples and climate change *Australia's Lost World* Michael Archer,Suzanne Hand,Suzanne J. Hand,Henk Godthelp,2000 In Queensland in northeast Australia lies one of the most significant fossil deposits in the world Riversleigh Here the remains of many thousands of weird and wonderful prehistoric animals have been superbly preserved in the limestone outcrops There are marsupial lions carnivorous kangaroos 23 foot long pythons primitive platypuses and early ancestors of the now extinct Tasmanian tiger So important is this site to our understanding of what has happened to Australia and its living cargo over the last 25 million years that Riversleigh has been inscribed on the World Heritage List Michael Archer Suzanne J Hand and Henk Godthelp the principal scientists on a remarkable excavation since 1976 explain the vast environmental and geographic changes that have occurred in this area since Australia broke away from the supercontinent of Gondwana and how the animals on board this continental raft evolved through the ages Photographs and evocative artwork bring to life the teeming tropical world that once existed in the now

arid wastes of Riversleigh and the authors discuss some of the unusual techniques used on a dig They describe how to recognize fossils how to date them and how to reconstruct extinct animals from them Originally published as Riversleigh The Story of Animals in Ancient Rainforests of Inland Australia this award winning book is being issued for the first time in the United States
