Looking For Memories Mike Robertson, 2024-02-05 Like some people recently retired Mark had taken on a diversion that pretty well takes up much of his time At one time he collected baseball cards a pastime that required him to acquire cards through trades with fellow enthusiasts or winning cards through arcane competitions when the application of Facebook allowed him to accumulate cards more easily Several years later on an airplane flight from Montreal to New York City Mark glimpses a television show being shown on a computer laptop belonging to a woman sitting in a seat across the aisle of that flight Mark thinks and then becomes convinced that one of the actresses playing a woman in that show is in fact his first girlfriend That realization results in a search for the identity of that woman through a variety of methods and sources an effort that culminates in a rendezvous with his memory

Richard A. Monty, John W. Senders, 2017-03-27 In the 10 years prior to publication the quantity of research on eye movements as they pertain to psychological processes had been increasing at a rapid rate Originally published in 1976 the editors purpose was to bring together investigators representing different theoretical positions and methodological approaches to present their recent findings to debate the theoretical points of view and to identify and discuss the major research problems on eye movements at the time An attempt was made to invite participants ranging all the way from promising graduate students through the established authorities in the field The result was an intensive three day session with meetings from early morning until late into the evening with much opportunity for formal and informal group discussion The edited papers and transcripts of the discussions are the contents of this book *Visuality and Virtuality*

Whitney Davis, 2022-06-14 A provocative and challenging new conceptual framework for the study of images This book builds on the groundbreaking theoretical framework established in Whitney Davis s acclaimed previous book *A General Theory of Visual Culture* in which he shows how certain culturally constituted aspects of artifacts and pictures are visible to informed viewers Here Davis uses revealing archaeological and historical case studies to further develop his theory presenting an exacting new account of the interaction that occurs when a viewer looks at a picture Davis argues that pictoriality the depiction intended by its maker to be seen emerges at a particular standpoint in space and time Reconstruction of this standpoint is the first step of the art historian s craft Because standpoints are inherently mutable and mobile pictoriality constantly shifts in form and possible meaning To capture this complexity Davis develops new concepts of radical pictorial ambiguity including bivisibility the fact that pictures can always be seen in ways other than intended pictorial naturalism and the behavior of pictures under changing angles of view He then applies these concepts to four cases Paleolithic cave painting ancient Egyptian tomb decoration classical Greek architectural sculpture with a focus on the Parthenon frieze and Renaissance perspective as invented by Brunelleschi A profound new theory of the work of both makers and viewers by one of the discipline s most esteemed and engaged thinkers *Visuality and Virtuality* is essential reading for art historians architects archaeologists and philosophers of art and visual theory Searching for Cioran

emigr sought out the aging philosopher in Paris in the early 1990s and retraced his steps from his home village of Rasinari and youthful years in Sibiu through his student years in Bucharest and Berlin to his early residence in France Her portrait of Cioran is complemented by an engaging autobiographical account of her rediscovery of her own Romanian past
