Loose Alliances:

Loose Alliances Mike Seeley,2000-03-01 **Gangs in America's Communities** James C. Howell,Elizabeth Griffiths,2015-02-18 *Gangs in America's Communities* offers a comprehensive up to date and theoretically grounded approach to gangs and associated youth violence Authors Dr James C Howell and Dr Elizabeth Griffiths introduce readers to the foundations of gang studies through the origins of gangs definitions and categories of youth street gangs transnational as well as prison gangs and the distinctions between these arguably different types national trends in gang presence and gang related violence across American cities distinguishing attributes of serious street gangs and myths and realities Students and instructors will benefit from the Second Edition's comprehensive treatment of the state of the literature on individual level causes and consequences of gang membership Going beyond the traditional topics covered in most texts in the market this book uniquely describes specific gang patterns trends and cultures within a group based structure while illuminating the most promising avenues for reducing the presence and seriousness of gangs in American communities *Peace Research* Peter Wallensteen,2013-03-01 Comprising essays by Peter Wallensteen this book presents an overview of the thematic development of peace research which has become one of the most dynamic and innovative areas of war and conflict studies Peace research began in the 1950s when centres were formed in the USA and Europe and today there are research institutes and departments on every continent with teaching and research programs in most countries and peace researchers contribute to the development of international studies development research and security analysis Prof Wallensteen has been a witness to much of this since forming the Department of Peace and Conflict Research at Uppsala University in the late 1960s and this book brings together thirteen of his articles with five new essays in one volume The book presents articles on such key issues in peace research as the causes of war conflict data conflict diplomacy non violent sanctions and third party diplomacy In this way it demonstrates how basic research can be conducted in fields often seen as unresearchable and too complicated to deal with This volume shows that it is a matter of developing definitions creating valid measures and finding ways of collecting information recognising that innovations of this kind require supportive research environments Furthermore the results are not only useful for the growth of research activity itself but for finding ways of dealing with actual conflicts Thus attention is also paid here to conflict prevention peace agreements sanctions and third party activity for preventing and ending armed conflict and building a lasting post war peace This book will be of great interest to all students of peace studies conflict resolution war and conflict studies development studies and IR security studies in general

The post-crisis Irish voter Michael Marsh, David M. Farrell, Theresa Reidy, 2018-08-31 This is the definitive study of the Irish general election of 2016 the most dramatic election in a generation which resulted in the worst electoral outcome for Ireland s established parties the most fractionalized party system in the history of the state and the emergence of new parties and groups These outcomes follow a pattern seen across a number of Western Europe s established democracies in which the deep crisis of the Great Recession has wreaked havoc on party systems The objective of this book is to assess this most extraordinary of Irish elections both in its Irish and wider cross national context With contributions from leading scholars on Irish elections and using a unique dataset the Irish National Election Study 2016 this volume explores voting patterns at Ireland s first post crisis election and it considers the implications for the electoral landscape and politics in Ireland Political Protest and Social Change C.

Andrain, D. Apter, 1994-12-19 This book probes three issues about the linkage between political protests and social change First why do individuals participate in protest activities including nonviolent movements and revolutions How do cultural beliefs sociopolitical structures personal attitudes motives and perceptions shape the decision to participate Second why do participants choose certain tactics Protesters use different types of tactics violent vs nonviolent public vs covert organized vs spontaneous and confrontation vs accommodation with other groups political parties and government agencies Most activists view a particular tactic as a useful means to attain their policy demands Third what policy consequences emerge from the activities of protest movements The book explores the impact of protests on social change and on the distribution of political power particularly greater access of subordinate groups to government policymakers A theory of political opportunities helps explain these issues about the origins activities and outcomes of protests **Political Protest and Social Change** Charles

F. Andrain, David Ernest Apter, 1995-09 At the close of the twentieth century political protests have erupted throughout the

world While the collapse of communism was certainly one of the most spectacular protest related events smaller protests have become ubiquitous In Los Angeles labor activists campaign against commercial real estate owners to unionize janitors mainly Latina immigrants In the People s Republic of China peasants revolt against tax collectors Amazonian Indians protest public and economic policies that destroy their culture and rainforest habitat This book analyzes the reciprocal impact of cultural beliefs sociopolitical structures and individual behaviors on protests throughout the world Why do individuals participate in protest activities How do cultural beliefs personal attitudes and subjective perception influence the potential protester Addressing the issue of agency in protest the authors also examine why protestors enlist different tactics to achieve their goals Why are some protests violent and others nonviolent When and why do activists conclude that it is better to accommodate than confront Finally and crucially what are the consequences of protest movements

Kashmir in Comparative Perspective Sten Widmalm, 2014-04-08 This book investigates the factors that led to the breakdown of democracy and the rise of violent separatism in Jammu and Kashmir in the 1980s and how the risk of a large scale war has grown in South Asia in the 1990s Solutions to this conflict need to be based on knowledge about what caused it as well as perspectives on why this conflict is so particularly dangerous Widmalm offers answers in this book with systematic comparisons over time to establish the causes of the conflict He refutes the contention that ethnic factors are the main cause while acknowledging that ethnic dividing lines are salient features of the conflict today Interviews with representatives of the Indian government the ISI in Pakistan and separatist leaders in Jammu and Kashmir are also incorporated Reports on the Vrokastro Area, Eastern Crete, Volume 2 University of Pennsylvania. Museum of Archaeology and Anthropology, Barbara J. Hayden, 2003 CD ROM for vol 2 includes Appendices 1-6 and the Vrokastro archaeological survey project

Remix Strategy Benjamin Gomes-Casseres, 2015 Alliances partnerships acquisitions mergers and joint ventures are no longer exceptions in most businesses they are part of the core strategy As companies look to external partners for acquiring even strategic resources and capabilities they need a practical road map for ensuring these relationships generate value What combinations of resources do we need How do we manage them over time What profits will we earn Will they justify our investments Benjamin Gomes Casseres shares insight from decades of consulting and academic research on how companies create new value by remixing resources with other companies Organized around three laws Remix Strategy explains how companies can gain the most from their business combinations First Law The value created by the combination should exceed the total that would be generated by the players acting alone How much more value can we create together in the market together What lies behind this joint value Second Law The combination must be designed and managed to realize the joint value in reality What partners and structures fit this goal best How do we manage those elements that are the sources of the joint value Third Law Each participant must earn sufficient profits to reward its investment How do we divide the joint value How might these shares change over time Other books explain how to structure deals or how to navigate complexities

of organization and culture This book provides core principles and a practical framework for creating and capturing value no matter the path chosen International Law United States Department of the Army, 1962 European Coalitions, Alliances and Ententes Since 1792 Fossey John Cobb Hearnshaw, Great Britain. Foreign Office. Historical Section, 1920 *Tourism Economics and Policy* Larry Dwyer, Peter Forsyth, Wayne Dwyer, 2010-10-27 Tourism Economics and Policy combines a comprehensive treatment of economic concepts and applications in tourism contexts Topics include tourism demand and forecasting tourism supply and pricing measuring the impacts and benefits of changes in tourism demand tourism investment and infrastructure tourism taxation aviation tourism and the environment including climate change and destination competitiveness The text provides an excellent basis for students to appreciate the relevance of economic analysis to the solution of real life tourism issues and as an input into tourism policy formulation War in a Changing World Zeev Maoz, Azar Gat, 2001 Essays tracing the changing nature of war in relation to global and regional changes **The Caspian Sea** William Ascher, Natalia Mirovitskaya, 2012-12-06 This volume is based on the presentations and deliberations of an Advanced Research Workshop ARW Caspian Sea A Quest for Environmental Security that was held on March 15 19 1999 in Venice Italy The Workshop was sponsored by the NATO s Division for Scientific and Environmental Affairs with additional support provided by the Trust for Mutual Understanding USA It was organized by Duke University s Center for International Development Research with the guidance of the International Committee of scientists from Russia United States Georgia and Italy and organizational assistance rendered by Venice International University The Caspian Sea region is of profound importance from the perspective of global and regional environmental security New geopolitical and economic circumstances have created a mixture of competition reluctant collaboration and legal political economic and ideological wrangling There is an intense debate over how the Caspian and its resources should be divided among littoral states and how these resources are to be developed While most littoral states and the international companies strive to develop the area s immense hydrocarbon potential it is clear that the Caspian s unique and fragile ecosystem is at risk Maritime Strategy for Medium Powers Rear Admiral J.R. Hill, 2021-05-30 This book first published in 1986 argues that there is a special category of medium powers in the world such as Britain France India Brazil Japan China and others which have sufficient military power to do something to protect their interests but which are not a match for the superpowers It surveys the whole range of naval warfare equipment operations organisation and deployment and discusses how each item should be tailored by the recognition of the position of the medium power It considers alliances a key element for medium powers and explores how these should be handled and what use they may be expected to fulfil The book argues that the concept of medium power here developed thoroughly for the first time will be extremely useful to many countries in defining their strategic role in a purposeful way **German Armies** Peter Wilson, 2002-11-01 German armies examines the diversity of German involvement in European conflict from the Peace of Westphalia to the age of Napoleon Challenging assumptions of the Holy Roman

Empire as weak and divided this study provides a comprehensive account of its survival in a hostile environment of centralizing belligerent states In contrast to the later german states the Empire was inherently defensive yet many of its component territories embarked on expansionist militaristic policies creating their own armies to advance their objectives The author examines the resultant tensions and explains the structure and role of the different German forces In addition a number of wider issues are addressed such as war and the emergence of absolutism the rise of Austria and Prussia as great powers non violent forms of conflict resolution and the relative effectiveness of German military and political institutions in meeting the challenge of revolutionary France Drawing on a range of sources the author provides a detailed analysis of the German dimension of the great struggles against Louis XIV s France competition for supremacy in the Baltic and Mediterranean and the prolonged wars with the Ottoman Turks German armies extends the boundaries of military history by placing ancien regime warfare within a wider social cultural and international context
