Model Shipwright 128:

Model Shipwright 128 John Bowen, Jr., 2005-02 This quarterly journal since its launch in 1972 has been regarded as the world's leading ship modelling publication. The mixture of articles, reviews, news and comment from modelmakers world wide provides the best and most detailed information available anywhere and is enhanced with authentic plans, clear diagrams and many photographs. Although the miniature ships are the most important feature of the journal, with articles explaining how individual models were researched and constructed, the other aspects of model making have not been forgotten: dioramas, modelling techniques, tools and recent events are all covered. Each issue of the journal comes complete with a free large scale modeller's draught with accompanying modelling notes, illustrations and specifications for a featured vessel. **Ship**

Modeling from Stem to Stern Milton Roth, 1988-02-22 Introduces useful tools and techniques, discusses kits, plans and work areas and covers painting, glues, hull construction, decks, masts, rigging, fittings, sails and metal parts. **The Ship of the Line** Brian Lavery, 2015-01-14 The National Maritime Museum in Greenwich houses the largest collection of scale ship models in the world, many of which are official contemporary artefacts made by the craftsmen of the navy or the shipbuilders themselves and ranging from the mid-seventeenth century to the present day. As such, they represent a three-dimensional archive of unique importance and authority. Treated as historical evidence, they offer more detail than even the best plans and demonstrate exactly what the ships looked like in a way that even the finest marine painter could not achieve. *The Ship of the Line* is the second of a new series that takes selections of the best models to tell the story of specific ship types; in this case, the evolution of the ship of the line, the capital ship of its day and the epitome of British seapower during its heyday from 1650-1850. This period too coincided with the golden age of ship modelling. Each volume depicts a wide range of models, all shown in full colour, including many close-up and detail views. These are captioned in depth but many are also annotated to focus attention on interesting or unusual features and the book weaves the pictures into an authoritative text producing a unique form of technical history. The series is of particular interest to ship modellers but all those with an enthusiasm for the ship design and development in the sailing era will be attracted to the in-depth analysis of these beautifully presented books.

The Master Shipwright's Secrets Richard Endsor, 2020-03-05 AWARDED THE ANDERSON MEDAL 2020 This splendid book will appeal to maritime historians, archaeologists, model makers and nautical enthusiasts across the board. Colin Martin, The Nautical Archaeology Society. A remarkable piece of work. J D Davies, Historian and Author. Inspired by the recent discovery of mathematically calculated digital plans for a fourth-rate ship by the Deptford master shipwright John Shish, *The Master Shipwright's Secrets* is an illustrated history of Restoration shipbuilding focused on the Tyger, one of the smaller but powerful two-deck warships of the period. It examines the proceedings of King Charles II in deciding the types of ship he wanted and his relationship with his master shipwrights. This fascinating book reveals the many secrets of Charles II's shipwrights through an analysis of John Shish's plans for the Tyger, revealing innovative practical calculations which differ

significantly from the few contemporary treatises on the subject and the complicated process of constructing the moulds necessary to make the ship's frame. All the other duties performed by the master shipwrights such as repairing ships, controlling their men and keeping up with the latest inventions are also discussed in detail. *The Master Shipwright's Secrets* is replete with beautiful and detailed illustrations of the construction of the *Tyger* and explores both its complicated history and its complex rebuilding, complete with deck plans, internal sections and large scale external shaded drawings. The title also explores associated ships including another fourth rate ship the *Mordaunt* which was purchased into the Navy at the time and underwent a dimensional survey by John Shish. A rare contemporary section drawing of another fourth rate English ship and constructional drawings of Shish's later fourth rate ship *St Albans* are also included.
