**Decision Making Using Game Theory** Anthony Kelly,2003-03-27 Game theory is a key element in most decision making processes involving two or more people or organisations This book explains how game theory can predict the outcome of complex decision making processes and how it can help you to improve your own negotiation and decision making skills It is grounded in well established theory yet the wide ranging international examples used to illustrate its application offer a fresh approach to an essential weapon in the armoury of the informed manager The book is accessibly written explaining in simple terms the underlying mathematics behind games of skill before moving on to more sophisticated topics such as zero sum games mixed motive games and multi person games coalitions and power Clear examples and helpful diagrams are used throughout and the mathematics is kept to a minimum It is written for managers students and decision makers in any field

**Economics for Humanity** Mitsuaki Okabe,2024-08-26 Economics is often referred to as the queen of social sciences This is because mainstream economics has been established as an elegant academic discipline by assuming mankind simply to be homo economicus an image of human beings showing interest in only material fulfilment and acting solely in his interest This book challenges this basic perception of human beings By replacing it with a more realistic and multifaceted human motive as supported by research in various academic disciplines the book tries to provide a novel and more plausible picture of human society Specifically the book takes in such human aspects as pursuing well being forming human networks and the realisation of potential of ability Thus if we try to better understand human motives and the society it becomes necessary to replace the conventional two sector market government social model with a more general and theoretically superior social model the three sector model consisting of market government non profit sectors This book demonstrates the validity of this new view by utilising basic principles of economic policy and social welfare analyses Moreover the book has introduced a newly developing practical philosophy in Japan over the last 50 years to achieve both individual well being and better human society

**Wicked Environmental Problems** Peter J. Balint,Ronald E. Stewart,Anand Desai,Lawrence C. Walters,2012-06-22 Wicked problems are large scale long term policy dilemmas in which multiple and compounding risks and uncertainties combine with sharply divergent public values to generate contentious political stalemates wicked problems in the environmental arena typically emerge from

entrenched conflicts over natural resource management and over the prioritization of economic and conservation goals more generally This new book examines past experience and future directions in the management of wicked environmental problems and describes new strategies for mitigating the conflicts inherent in these seemingly intractable situations The book reviews the history of the concept of wicked problems examines the principles and processes that managers have applied explores the practical limitations of various approaches Most important the book reviews current thinking on the way forward focusing on the implementation of learning networks in which public managers technical experts and public stakeholders collaborate in decision making processes that are analytic iterative and deliberative Case studies of forest management in the Sierra Nevada restoration of the Florida Everglades carbon trading in the European Union and management of the Ngorongoro Conservation Area in Tanzania are used to explain concepts and demonstrate practical applications Wicked Environmental Problems offers new approaches for managing environmental conflicts and shows how managers could apply these approaches within common real world statutory decision making frameworks It is essential reading for anyone concerned with managing environmental problems

**Raising the Acceptance of Rank Reversing Redistributions** Patricia F. Zauchner, 2024-07-31 Redistribution is a major objective of welfare states In certain cases redistribution not only reduces the financial differences between some individuals or groups but also changes their positions in a financial ranking Prior studies have indicated that such rank reversals can reduce support for redistribution This book addresses this issue by arguing that if redistribution is aimed at meeting needs rather than promoting equality the negative effect of rank reversals on the acceptance of redistribution can be reduced The argument is first supported by a theoretical exploration which among others endeavors to incorporate a no reranking principle into the well established list of distributive justice principles It shows that although individuals may apply the no reranking principle the principle is normatively weak especially compared to the need principle The argument is further supported by evidence from an online third party dictator game in which each decision maker had to redistribute money between two other participants It varied whether those participants were above or below a specific needs threshold and whether a transfer would reverse ranks or not The results showed that when redistribution was required to satisfy the poorer person s needs the negative effect of rank reversals on the acceptance of redistribution almost vanished

**Multi-Criteria Decision Making in Maritime Studies and Logistics** Paul Tae-Woo Lee, Zaili Yang, 2017-10-24 This book describes a wide range real case applications of Multi Criteria Decision Making MCDM in maritime related subjects including shipping port maritime logistics cruise ports waterfront developments and shipping finance etc In such areas researchers students and industrialists in general felt struggling to find a step by step guide on how to apply MCDM to formulate effective solutions to solving real problems in practice This book focuses on the in depth analysis and applications of the most well known MDCM methodologies in the aforementioned areas It brings together an eclectic collection of twelve chapters which seek to respond to these challenges The book begins with an introduction and is followed by an overview of major MCDM techniques The next chapter examines the theory of analytic hierarchy process AHP in detail and investigates a fuzzy AHP FAHP approach and its capability and rationale in dealing with decision problems of ambiguous information Chapter 4 proposes a generic methodology to identify the key factors influencing green shipping and to establish an evaluation system for the assessment of shipping greenness In Chapter 5 the authors describe a new function of fuzzy Evidential Reasoning ER to improve the vessel selection process in which multiple criteria with insufficient and ambiguous information are evaluated and synthesized Chapter 6 presents a novel methodology by using an Artificial Potential Field APF model and the ER approach to estimate the collision probabilities of monitoring targets for coastal radar surveillance Chapter 7 develops the inland port performance assessment model IPPAM using a hybrid of AHP ER and a utility function The next

chapter showcases a challenging approach to address the risk and uncertainty in LNG transfer operations by utilizing a Stochastic Utility Additives UTA method with the help of the philosophy of aggregation disaggregation coupled with a robustness control procedure Chapter 9 uses Entropy and Grey Relation Analysis GRA to analyze the relative weights of financial ratios through the case studies of the four major shipping companies in Korea and Taiwan Evergreen Yang Ming Hanjin and Hyundai Merchant Marine Chapter 10 systemically applies modern heuristics to solving MCDM problems in the fields of operation optimisation in container terminals Arguing that bunkering port selection is typically a multi criteria group decision problem and in many practical situations decision makers cannot form proper judgments using incomplete and uncertain information in an environment with exact and crisp values in Chapter 11 the authors propose a hybrid Fuzzy Delphi TOPSIS based methodology with a sensitivity analysis Finally Chapter 12 deals with a new conceptual port performance indicators PPIs interdependency model using a hybrid approach of a fuzzy logic based evidential reasoning FER and a decision making trial and evaluation laboratory DEMATEL

*Toward a Theory of Governance* Jacques Lenoble, Marc Maesschalck, 2003-01-01 For more than a century Western democracies have struggled to keep faith with both economic efficiency and social justice Yet reconciliation of these factors remains as baffling as ever Among the many voices clamoring today for a theory of collective action we hear most often of the great chasm between legitimacy and efficiency It is the contention of the authors of this ground breaking book that these antinomies can be seen as distinct moments of application in the operation of normative judgement and that a reflexive treatment of norms of collective action by clarifying limitations in rules and beliefs allows us to develop mechanisms to correct the limiting effects of such judgements and act accordingly Drawing on and developing recent trends in the social sciences *The Action of Norms* presents a powerful new theory of governance with far reaching implications for the future of law the judiciary and justice itself Among the contributing modern ideas that are explained and developed as pillars of the authors thesis are the following critiques of the political theory of interest groups the economic theory of efficiency deliberative democracy rational choice theory the evolutionist debate learning process theory and the theory of risk Lenoble and Maesschalck achieve a remarkable synthesis of relevant thought about forms of social organization from Kant and Fichte through Hayek Rawls and Habermas to current theory and place it at the service of a new and effective theory of the norm that promises to greatly elucidate the role of law and legal practice in the continuing development of democratic institutions

*New Concepts and Trends of Hybrid Multiple Criteria Decision Making* Gwo-Hshiung Tzeng, Kao-Yi Shen, 2017-08-15 When people or computers need to make a decision typically multiple conflicting criteria need to be evaluated for example when we buy a car we need to consider safety cost and comfort Multiple criteria decision making MCDM has been researched for decades Now as the rising trend of big data analytics in supporting decision making MCDM can be more powerful when combined with state of the art analytics and machine learning In this book the authors introduce a new framework of MCDM which can lead to more accurate decision making Several real world cases will be included to illustrate the new hybrid approaches

*International Business Strategy* Alain Verbeke, 2009-01-12 This textbook shows how the key concepts from business strategy literature can be applied to create successful global business
