The Newly Industrializing Economies of East Asia Anis Chowdhury, Iyanatul Islam, 2005-08-09 The phenomenal success of the East Asian Newly Industrializing Economies NIEs of Korea Taiwan Hong Kong and Singapore is now well known and documented Their success has been discussed to such an extent that it has become entrenched as part of the folklore of development economics The Newly Industrializing Economies of East Asia takes a fresh look at the relevant literature and sifts the rhetoric from the reality In the course of surveying the vast range of writing two competing paradigms become clear the neo classical approach which interprets the East Asian economic miracle as the predictable outcome of good policies and the statist perspective which draws attention to the central role of the government in guiding East Asian economic development Throughout the book the authors mix country specific experiences with broader trends

The Flexible Economy Tony Killick, 2005-07-18 The accelerating pace of global change demands that economies must be adaptable Economies which are flexible flourish as in Eastern Asia Inflexible economies stagnate as in Eastern Europe and Africa However even though adaptability governs the long term progress of economies economists have had little to say about the nature and determinants of economic flexibility This book redresses that situation A prestigious team of contributors address the key theoretical and empirical issues using a wide range of country studies

Regional Change in Industrializing Asia Leo van Grunsven, 2019-01-04 First published in 1998 this book responds to the dynamics of Industrializing Asia and the behavioural changes of actors which in response to changing internal and

external forces have given rise to and are constantly giving rise to alterations in patterns of growth. From a geographical perspective these are expressed in regional change understood as a reconstruction of spatial organization. The imperatives of dynamic comparative advantage, changing global or regional competitiveness and regional competition faced by different actors, entities or territorial units can be identified as important forces underlying and shaping regional change. This volume provides further illumination, contextualization and interpretation of the spatiality of the economic reality in Industrializing Asia as well as the role played by and the implications for different actors. The objectives of this book are 1 to outline the processes of regional change linked to responses in the form of restructuring and integrative and regionalization tendencies as well as the realignment of the global-regional-local divide in production systems complexes and the operation of firms associated with reorganization of production in the process of maintaining and reconfiguring comparative advantage 2 to highlight the wide scope of the process by considering differential units of analysis linked to the agents and manifestations of regional change and the role of scale in terms of the spatial units involved 3 to highlight the implications as to the current and future position or role of differential actors, agents particularly nation-state in shaping the new economic reality in the region and as a corollary its positioning in the global economic order.

Money, Trade, and Competition Herbert Giersch, 2012-12-06 On June 1 1990 Egon Sohmen would have reached the age of 60 had he not suffered from a fatal illness. It demanded his death at the early age of 46. If he were still with us he would play a prominent role in the current debate on monetary arrangements and on allocation theory perhaps including environmental issues and urban economics. His contributions are well remembered by his colleagues and friends by his former students and by many in the economics profession on both sides of the Atlantic. In extrapolating his great achievements as a scholar and teacher beyond the time of his death one is inclined to suppose that Egon Sohmen's name would figure high on many a list of candidates for honors and awards in the field of international economics. For the reconstruction of economics in the German language area Egon Sohmen was invaluable. Born in Linz Austria he studied in Vienna at the Business School Hochschule für Welthandel now Wirtschaftsuniversität then went to the US as a Fulbright scholar 1953 returned to Europe to take his doctorate in Tübingen Germany 1954 and crossed the Atlantic again to teach at MIT 1955-58 where he obtained a Ph.D. 1958 under Charlie Kindleberger. He might have stayed permanently in the US continuing a career that he started as Assistant Professor at Yale University 1958-61 if the US visa provisions had been applied in a more liberal fashion.

Governing the Market Robert Wade, 2018-06-05 Published originally in 1990 to critical acclaim Robert Wade's *Governing the Market* quickly established itself as a standard in contemporary political economy. In it Wade challenged claims both of those who saw the East Asian story as a vindication of free market principles and of those who attributed the success of Taiwan and other countries to government intervention. Instead Wade turned attention to the way allocation decisions were divided between markets and public administration and the synergy between them. Now in a new introduction to this paperback edition Wade reviews the debate about industrial policy in East and Southeast Asia and chronicles the changing fortunes of these economies over the 1990s. He extends the original argument to explain the boom of the first half of the decade and the crash of the second, stressing the links between corporations, banks, governments, international capital markets and the International Monetary Fund. From this Wade goes on to outline a new agenda for national and international development policy.

Market Cultures Robert W. Hefner, 2018-10-08 *Market Cultures* examines the spectacular growth of capitalist enterprise among overseas Chinese and Southeast Asians. It does so not through formal models but by way of the varied cultures and organizations in which Asian capitalism is embedded. Eschewing talk of a uniform Asian miracle, the book shows that there existed complex precedents for.

How Asia Works Joe Studwell, 2013-07-02 A good read for anyone who wants to understand what actually determines whether a developing economy will succeed. Bill Gates Top 5 Books of the Year. An Economist Best Book of the Year from a reporter who has spent two decades in the region and who the Financial Times said should be named chief myth buster for Asian business. In *How Asia Works* Joe Studwell distills his extensive research into the economies of nine countries: Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis focuses on three main areas: land, policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient. Studwell argues. Instead, countries need export discipline, a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill. Provocative, *How Asia Works* is a striking and enlightening book. A lively mix of scholarship, reporting, and polemic. The Economist.

The Competitive Advantages of Far Eastern Business Robert Fitzgerald, 2020-04-23 This volume discusses the causes of economic achievement in the leading East Asian countries in
