Public Health, Public Health Education, and their Future Prospects Xuelei Ma, Hubing Shi, Yihui Du, Wenhao Cai, 2024-04-15. A number of studies have pointed out that currently, medical schools may have failed to supply self-directed lifelong learners and qualified healthcare workers. Therefore, in recent years, the medical teaching modes have been consistently reformed. The new generation of novel education modes such as Research-Based Learning (RBL), Problem-Based Learning (PBL), Team-Based Learning (TBL) have the characteristics of universality, interactivity, and promptness, which empower instructors and students to learn and grow together. Moreover, the reform of medical teaching modes has been significantly facilitated in the COVID-19 era due to the public's rising awareness of public health and more obviously pandemic prevention policies such as travel restrictions. For instance, many countries have launched remote teaching mode in order to provide consistent education service with high quality. These novel teaching modes can provide amelioration to the traditional education modes and may lead the education system to another prosperity.
