Models Of Sustainable Development:

Models of Sustainable Development Sylvie Faucheux, David Pearce, John L. R. Proops, 1996 Theory and Implementation of Economic Models for Sustainable Development J.C. van den Bergh, M.W. Hofkes, 1998-06-30 There is widespread concern for long term environmental issues in relation to economic processes and developments Among the concerned scientists are economists who have taken up the challenge to apply economic insights and tools for the study of long term environment economy interactions and to give the concept of sustainable development economic hands and feet This book presents a pluralistic perspective on efforts problems and successes in this area This collection of papers was originally prepared for an international symposium titled Economic Modelling of Sustainable Development Between Theory and Practice which was hosted by the Vrije Universiteit in Amsterdam on December 20th 1996 The main motivation for this symposium was that the usefulness of the concept of sustainable development for theoretical and applied modelling is still being debated growth theorists resource economists ecological economists policy makers and many others are trying to deal with the concept in various and sometimes conflicting ways The aim of the symposium was to bring together different theoretical and implementational perspectives on modelling for sustainable development We hope that this volume will inform a wide audience about the perspectives and progress in this important area of research as well as stimulate further research notably on applied modelling and practical methods for the analysis of sustainable development at various spatial scales The papers have in due course been revised several times based on comments made by discussants referees and the editors *Natural Resources, Development Models and Sustainable Development* Richard M. Auty, International Institute for Environment and Development, 2009 **Natural Resources, Development Models and Sustainable Development** Richard M. Auty, 2003 **History, Definition(s) and Models of Sustainable Development** Marco Keiner, Eidgenössische Technische Hochschule (Zürich). Institut für Raum- und Landschaftsentwicklung, 2005 **Integrated Global Models of Sustainable Development** Akira Onishi, 2009 Innovative Models for Sustainable Development in Emerging African Countries Niccolò Aste, Stefano Della Torre, Cinzia Talamo, Rajendra Singh Adhikari, Corinna Rossi, 2019-12-30 This open access book explores key issues and presents recent case studies in areas of importance for the transition to a circular model of development in emerging African countries that will minimize resource consumption and waste production The topics covered include the development of sustainable housing models energy and environmental issues in building design and technical systems recycling for a sustainable future models for humanitarian emergencies and low cost and web based digital tools with applications in architecture and archaeology The aim is to contribute to a necessary paradigm shift with respect to urban planning and usage of territories moving from a linear urban metabolism based on the take make dispose approach to a circular metabolism Such a change requires a focus on the relationship between the architectural urban and physical aspects of new developments climate and energy demand as well as the identification and integration of strategies and

infrastructures to achieve a high level of efficiency and self sufficiency The book will appeal to all with an interest in sustainable development in the African context *Models of Economic Growth with Environmental Assets* A.

Beltratti,2013-03-09 The connection between economic growth and the quality of the environment is a popular subject Since the second half of the 1980s there has been an increasingly frequent use of the term sustainable development to refer to the preoccupation that the production of goods and services may decrease standards of living It is natural to analyze this question from the point of view of economic models which may be helpful in at least identifying the main factors behind such preoccupations and perhaps in suggesting policy measures Indeed models are useful to discuss some relevant factors like the structure of production of the economy the type of preferences and goals pursued by agents and the elements of uncertainty This monograph will consider some of these themes there will be a study of the analytical framework which can be used for the purpose of defining and analyzing sustainability and some discussion of how to calibrate a restricted version of the model to empirical data There will be also some analysis about which type of uncertainty should be incorporated into the model and which objective functions may be useful for policy purposes Also there will be discussions about the key variables which should be included and some description of a general framework *Corporate Social Responsibility* R. K. Narang,2009
