Paul T. Frankl and Modern American Design Christopher Long, 2007-01-01 A comprehensive view of the life work and ideas of one of the creative giants of modern American design Arriving in the United States in 1914 Viennese born Paul T. Frankl 1886-1958 brought with him an outsider's fresh perspective and an enthusiasm for forging a uniquely American design aesthetic In the years between the two world wars he more than any other designer helped shape the distinctive look of American modernism This authoritative book draws on an extensive collection of unpublished documents and family papers and photographs to provide the first full account of Frankl's life and ideas The book also explores the history of modern American design and the extent of Frankl's influence on its trajectory In the early 1920s Frankl opened a New York City shop that became an epicenter of American modernism Over the next decades his work encompassed everything from individual pieces of furniture and decorative accessories to entire interiors and his style continuously evolved from early Skyscraper furniture to relaxed and casual designs favored by the Hollywood elite in the 1930s to manufactured pieces for the mass market in the 1950s The book charts the impact of Frankl's ideas on merchants and consumers on his fellow designers and on the changing look of American homes and workplaces With close to 170 illustrations Paul T. evoking the nostalgia of the 50s and 60s when Pop and Rock held sway Pulos probes all aspects of industrial designers and their work in education and private corporations in professional organizations and governmental agencies He also covers prefabricated housing graphics manufactured products from the exotic to the pragmatic and public systems from the sociopolitical to the economic

Mid-Century Modern Interiors Lucinda Kaukas Havenhand, 2019-01-24 Mid Century Modern Interiors explores the history of interior design during arguably its most iconic and influential period The 1930s to the 1960s in the United States was a key moment for interior design It not only saw the emergence of some of interior design's most globally important designers it also saw the field of interior design emerge at last as a profession in its own right Through a series of detailed case studies this book introduces the key practitioners of the period world renowned designers including Ray and Charles Eames Richard Neutra and George Nelson and examines how they developed new approaches by applying systematic and rational principles to the creation of interior spaces It takes us into the mind of the designer to show how they each used interior design to express their varied theoretical interests and reveals how the principles they developed have become embodied in the way interior design is practiced today This focus on unearthing the underlying ideas and concepts behind their designs rather than on the finished results creates a richer more conceptual understanding of this pivotal period in modernist design history With an extended introduction setting the case studies within the broader context of twentieth century design and architectural history this book provides both an introduction and an in depth analysis for students and scholars of interior design architecture and design history

The Politics of Furniture Freddie Floré, Cammie McAtee, 2017-02-10 In many different parts of the world modern furniture elements have served as material expressions of power in the post war era They were often meant to express an international and in some respects apolitical modern language but when placed in a sensitive setting or a meaningful architectural context they were highly capable of negotiating or manipulating ideological messages The agency of modern furniture was often less overt than that of political slogans or statements but as the chapters in this book reveal it had the potential of becoming a persuasive and malleable ally in very diverse politically charged arenas including embassies governmental ministries showrooms exhibitions design schools libraries museums and even prisons This collection of chapters examines the

consolidating as well as the disrupting force of modern furniture in the global context between 1945 and the mid 1970s The volume shows that key to understanding this phenomenon is the study of the national as well as transnational systems through which it was launched promoted and received While some chapters squarely focus on individual furniture elements as vehicles communicating political and social meaning others consider the role of furniture within potent sites that demand careful negotiation whether between governments cultures or buyer and seller In doing so the book explicitly engages different scholarly fields design history history of interior architecture architectural history cultural history diplomatic and political history postcolonial studies tourism studies material culture studies furniture history and heritage and preservation studies Taken together the narratives and case studies compiled in this volume offer a better understanding of the political agency of post war modern furniture in its original historical context At the same time they will enrich current debates on reuse relocation or reproduction of some of these elements
