Modern Biology Visions Of Humanity:

Modern Biology & Visions of Humanity European Group on Life Sciences, 2004 Ethical questions arising from developments in modern biology such as If we are genetically determined where is free will Is it right for humans to create new foods and Should organizations be allowed to hold the keys to the production of vast amounts of food globally in the form of a patent are discussed in this collection of presentations from the 2004 European Commission sponsored conference Modern Biology and Visions of Humanity Organized into four sections the contributions from this event reflect on the complex relationship between science and society and touch on such subjects as what are the benefits of science who decides its uses and how science relates to other areas of human creativity Leading figures in the worlds of science and the arts take sides in these essays in either promoting the products and services biology provides challenging biology's vision of humanity or questioning the whole approach of Western science from a political perspective **The Social Meaning of Modern**

Biology Howard Kaye, 2017-07-05 The Social Meaning of Modern Biology analyzes the cultural significance of recurring attempts since the time of Darwin to extract social and moral guidance from the teachings of modern biology Such efforts are often dismissed as ideological defenses of the social status quo of the sort wrongly associated with nineteenth century social Darwinism Howard Kaye argues they are more properly viewed as culturally radical attempts to redefine who we are by nature and thus rethink how we should live Despite the scientific and philosophical weaknesses of arguments that biology is destiny and their dehumanizing potential in recent years they have proven to be powerfully attractive They will continue to be so in an age enthralled by genetic explanations of human experience and excited by the prospect of its biological control In the ten years since the original edition of The Social Meaning of Modern Biology was published changes in both science and society have altered the terms of debate over the nature of man and human culture Kaye's epilogue thoroughly examines these changes He discusses the remarkable growth of ethology and sociobiology in their study of animal and human behavior and the stunning progress achieved in neuropsychology and behavioral genetics These developments may appear to bring us closer to long sought explanations of our physical mental and behavioral machinery Yet as Kaye demonstrates attempts to use such explanations to unify the natural and social sciences are mired in self contradictory accounts of human freedom and moral choice The Social Meaning of Modern Biology remains a significant study in the field of sociobiology and is essential reading for sociologists biologists behavioral geneticists and psychologists

Visions of the Human Tom Slevin, 2015-05-28 In what ways do the artistic avant garde s representations of the human body reflect the catastrophe of World War I The European modernists were inspired by developments in the nineteenth century yielding new forms of knowledge about the nature of reality and repositioning the human body as the new object of knowledge New visions of the human subject were created within this transformation However modernity s reactionary political climate for which World War I provided a catalyst transformed a once liberal ideal between humanity environment and technology into a tool of disciplinary rationalisation Visions of the Human considers the consequences of this historical moment for the twentieth and twenty first centuries It explores the ways in which the technologies of the self that inspired the avant garde were increasingly instrumentalised by conservative politics urbanism consumer capitalism and the society of the spectacle This is an engaging and powerful study which challenges prior ideas and explores new ways of thinking about modern visual culture

Altruism and Christian Ethics Colin Grant, 2000-11-16 Separated from its anchorage in religion ethics has followed the social sciences in seeing human beings as fundamentally characterised by self interest so that altruism is either naively idealistic or arrogantly self sufficient Colin Grant contends that as a modern secular concept altruism is a parody on the self giving love of Christianity so that its dismissal represents a social levelling that loses the depths that theology makes intelligible and religion makes possible The Christian affirmation is that God is characterised by self giving love agape then expected of Christians Lacking this theological background the focus on self interest in sociobiology and economics and on human realism in the political focus of John Rawls or the feminist sociability of Carol Gilligan finds altruism naive or a dangerous distraction from real possibilities of mutual support This book argues that to dispense with altruism is to dispense with God and with the divine transformation of human possibilities

Vision and Motor Control L. Proteau, D. Elliott, 1992-02-20 Since the classic studies of Woodworth 1899 the role of vision in the control of movement has been an important research topic in experimental psychology While many early studies were concerned with the relative importance of vision and kinesthesia and or the time it takes to use visual information recent theoretical and technical developments have stimulated scientists to ask questions about

how different sources of visual information contribute to motor control in different contexts In this volume articles are presented that provide a broad coverage of the current research and theory on vision and human motor learning and control Many of the contributors are colleagues that have met over the years at the meetings and conferences concerned with human movement They represent a wide range of affiliation and background including kinesiology physical education neurophysiology cognitive psychology and neuropsychology Thus the topic of vision and motor control is addressed from a number of different perspectives In general each author sets an empirical and theoretical framework for their topic and then discusses current work from their own laboratory and how it fits into the larger context A synthesis chapter at the end of the volume identifies commonalities in the work and suggests directions for future experimentation

Human Flourishing in a Technological World Jens Zimmermann, 2023-09-21 Human Flourishing in a Technological World addresses fundamental questions about human identity and flourishing in the light of recent technological advances It includes the text of a lecture by virtual reality engineer and computer scientist Jaron Lanier and a discussion between Lanier and other contributors

Science Fiction, Ethics and the Human Condition Christian Baron, Peter Nicolai Halvorsen, Christine Cornea, 2017-07-10 This book explores what science fiction can tell us about the human condition in a technological world with the ethical dilemmas and consequences that this entails This book is the result of the joint efforts of scholars and scientists from various disciplines This interdisciplinary approach sets an example for those who like us have been busy assessing the ways in which fictional attempts to fathom the possibilities of science and technology speak to central concerns about what it means to be human in a contemporary world of technology and which ethical dilemmas it brings along One of the aims of this book is to demonstrate what can be achieved in approaching science fiction as a kind of imaginary laboratory for experimentation where visions of human or even post human life under various

scientific technological or natural conditions that differ from our own situation can be thought through and commented upon. Although a scholarly work, this book is also designed to be accessible to a general audience that has an interest in science fiction as well as to a broader academic audience interested in ethical questions.

The Vision Thing Thomas Singer, 2014-01-14

Contemporary politics goes on at a mythic level. This is the provocative argument put forward in this unique book which results from the collaboration of practising politicians, organisational and political consultants, scholars of mythology and culture, and Jungian analysts from several countries. The first part of the book focuses on leadership and vision and features a reflection on myth and leadership by former U.S. Senator Bill Bradley. The second part deals with the way the theme of the one and the many works itself out in politics today. From the perspective of the many, there are chapters on factionalism, ethnic strife, genocide, and multiculturalism. From the perspective of the one, there are chapters on the economic myth and gender politics, showing how these bring coherence to today's confused political scene, culminating in the suggestion that the modern political psyche is itself in the midst of a rite of passage. The relevance of the book to the practice and study of politics, mainstream and marginal, cannot be overemphasised, and the book will provide stimulating reading for practitioners and students in these areas as well as for those engaged in psychological work such as therapy, counselling, or analysis.
