Revista Geopolítica , *Geographies of an Imperial Power* Jeremy Black, 2018-01-06 From explorers tracing rivers to navigators hunting for longitude spatial awareness and the need for empirical understanding were linked to British strategy in the 1700s This strategy in turn aided in the assertion of British power and authority on a global scale In this sweeping consideration of Britain in the 18th century Jeremy Black explores the interconnected roles of power and geography in the creation of a global empire Geography was at the heart of Britain s expansion into India its response to uprisings in Scotland and America and its revolutionary development of railways Geographical dominance was reinforced as newspapers stoked the fires of xenophobia and defined the limits of cosmopolitan Europe as compared to the barbarism beyond Geography provided a system of analysis and classification which gave Britain political cultural and scientific sovereignty Black considers geographical knowledge not just as a tool for creating a shared cultural identity but also as a key mechanism in the formation of one of the most powerful and far reaching empires the world has ever known

Graceful Reading Michael Davies, 2002-07-04 Graceful Reading offers a new way of understanding Bunyan s theology and his narrative art examining and reassessing the complex and interdependent relationship between them Michael Davies begins by proposing that Bunyan s theology is far from obsessed with the forbidding Calvinist doctrine of predestination and its corollary tendency towards painful introspection Bunyan s is rather a comfortable doctrine in which the believer is encouraged to accept salvation through the far more assuring terms of Bunyan s covenant theology those of faith and grace The book then reassesses how Bunyan s narrative style is informed by this

theology Works such as *Grace Abounding* and *The Pilgrim's Progress* reveal a profound sensitivity to narrative forms and reading practices as they aim to inculcate in their readers a self-consciousness about reading itself which is instrumental in the very process of spiritual instruction in seeing things unseen This is a study therefore which asserts a radically different way of reading of Bunyan's writings both through the terms of seventeenth century covenant theology and through some distinctly postmodernist ideas about narrative practice
