Modern Europe After Fascism Volume :

Modern Europe After Fascism, 1943-1980s Stein Ugelvik Larsen, Bernt Hagtvet, 1998 This comprehensive study of the fate of fascism after World War II by fifty of the leading scholars of fascism and totalitarianism focuses on developments in Germany Austria Italy Central and Eastern Europe the neutral countries and those not occupied by Germany the western European countries occupied by German forces and Spain Portugal and Greece Europe after Empire Elizabeth Buettner, 2016-03-24 Europe after Empire is a pioneering comparative history of European decolonization from the formal ending of empires to the postcolonial European present Elizabeth Buettner charts the long term development of post war decolonization processes as well as the histories of inward and return migration from former empires which followed She shows that not only were former colonies remade as a result of the path to decolonization so too was Western Europe with imperial traces scattered throughout popular and elite cultures consumer goods religious life political formations and ideological terrains People were also inwardly mobile including not simply Europeans returning home but Asians Africans West Indians and others who made their way to Europe to forge new lives The result is a Europe fundamentally transformed by multicultural diversity and cultural hybridity and by the destabilization of assumptions about race culture and the meanings of place and where imperial legacies and memories live on The Nature of Fascism Roger Griffin, 2013-10-11 The Nature of Fascism draws on the history of ideas as well as on political social and psychological theory to produce a synthesis of ideas and approaches that will be invaluable for students Roger Griffin locates the driving force of fascism in a distinctive form of utopian myth that of the regenerated national community destined to rise up from the ashes of a decadent society He lays bare the structural affinity that relates fascism not only to Nazism but to the many failed fascist movements that surfaced in inter war Europe and elsewhere and traces the unabated proliferation of virulent but thus far successfully marginalized fascist activism since 1945 **Contemporary British Fascism** N. Copsey, 2016-02-02 For the first time since the 1970s when the National Front became Britain's fourth largest political party the recent electoral success of the British National Party has put Britain's extreme right back on the political map Nigel Copsey provides a clear and comprehensive analysis of the history of the British National Party and its struggle for political legitimacy With far right parties enjoying unprecedented success across Europe this book also locates its subject in the broader international context , **Dealing with the Legacy of Authoritarianism** Antonio Costa Pinto, Leonardo Morlino, 2013-09-13 In recent years the agenda of how to deal with the past has become a central dimension of the quality of contemporary democracies Many years after the process of authoritarian breakdown consolidated democracies revisit the past either symbolically or to punish the elites associated with the previous authoritarian regimes New factors like international environment conditionality party cleavages memory cycles and commemorations or politics of apologies do sometimes bring the past back into the political arena This book addresses such themes by dealing with two dimensions of authoritarian legacies in Southern European democracies

repressive institutions and human rights abuses The thrust of this book is that we should view transitional justice as part of a broader politics of the past an ongoing process in which elites and society under democratic rule revise the meaning of the past in terms of what they hope to achieve in the present This book was published as a special issue of South European Society and Politics Reassessing Political Ideologies Michael Freeden,2004-08-02 This book is a high level examination of each of the major ideologies that have shaped political thinking action and conflict Each chapter provides a critical overview of the current state of the major ideologies and a retrospective assessment of the strengths weaknesses developments and transformations of these ideologies over the past century The volume poses a strong challenge to those who have loudly proclaimed the end of ideology by demonstrating that it is impossible to understand current political developments without an appreciation of their ideological context It features internationally respected contributors who are authorities in their fields and will be an invaluable resource for both students and specialists in areas including Politics and International Relations Totalitarian and Authoritarian Regimes in Europe Jerzy W. Borejsza,Klaus Ziemer,Magdalena Hułas,Niemiecki instytut historyczny (Varsovie),2006 Based on a conference organized by the Institute of History of the Polish Academy of Sciences and the German Historical Institute Warsaw held in Sept 2000 Legacies of the Nazi camps in Norway : Falstad 1941-49 Trond Risto Nilssen,Jon Reitan,2020-01-01 During World War 2 WW2 Nazi Germany established 500 camps in occupied Norway In May 1945 these camps quickly became symbols of terror and death At war s end war criminals and collaborators had to be arrested pending their trials in a time marked by revenge This book examines new perspectives on the scope and fate of the Nazi camps in Norway during WW2 One of the most symbol laden sites in Norwegian war history is in focus The SS camp Falstad in central Norway was an arena of Nazi abuses from 1941 1945 After the war it was made into a prison and played a key part in the Norwegian post war trials **European Fascist Movements** Roland Clark,Tim Grady,2023-05-31 This volume offers a fresh and original collection of primary sources on interwar European fascist movements These sources reflect new approaches to fascism that emphasise the practical transnational experience of fascism as a social movement contextualising ideological statements within the historical moments they were produced Divided into 18 geographically based chapters contributors draw together the history of various fascist and right wing movements selecting sources that reflect themes such as transnational ties aesthetics violence female activism and the instrumentalisation of race gender and religion Each chapter provides a chronological narrative account of movements interspersed with complete primary sources from political speeches internal movement circulars and articles police reports oral history songs and music photographs artworks poetry and anti fascist sources The volume as a whole seeks to introduce readers to the diversity of fascist groups across the continent to show how fascist groups were constituted through social bonds rather than around fixed ideologies and to capture the inexperience and ad hoc character of early fascist groups With an Introduction that explains the volume s theoretical approach and elaborates on the chronology of European fascism this is

long history of the österreichische Creditanstalt and its successor organizations and opens the way to compare and contrast experiences throughout Central and Western Europe and also on other continents The structure of this volume reflects the changing role and nature of banks as economies become industrialized and modernized Although banks adapt to the needs of an industrializing economy at the same time industrialization influences the manner in which banking systems grow and the structures which they adopt Beginning with studies of the Austrian banks their development and their crises the volume then moves on to look at case studies of important aspects of financial activity German stock markets railroad investment and information networks This is followed by a section on country studies of banking modernization in Sweden the Netherlands and Greece Finally the collection concludes with two chapters one on banking in China and the other on banking in India certainly both of intrinsic interest and of importance in an era of globalization Professor Teichova one of the great scholars in the field concludes with reflections on the individual contributions and the general problems addressed in this book

Memory, War, and Dictatorship in Recent Spanish Fiction by Women Sarah Leggott, 2015-06-10 *Memory War and Dictatorship in Recent Spanish Fiction by Women* analyzes five novels by women writers that present women's experiences during and after the Spanish Civil War and Franco dictatorship highlighting the struggles of female protagonists of different ages to confront an unresolved individual and collective past It discusses the different narrative models and strategies used in these works and the ways in which they engage with their political and historical context particularly in the light of campaigns for the so called recovery of historical memory in Spain the memory boom and in the broader context of memory and trauma studies The novels that are examined in this book are Dulce Chacón's *La voz dormida* 2002 Rosa Regés's *Luna lunera* 1999 Josefina Aldecoa's *La fuerza del destino* 1997 Carme Riera's *La mitad del alma* 2005 and Almudena Grandes's *El corazón helado* 2007 These works all highlight the multiple nature of memories and histories and demonstrate the complex ways in which the past impacts on the present This book also considers the extent to which the memories represented in these five novels are inflected by gender and informed by the gender politics of twentieth century and contemporary Spain

The Vocabulary of a Modern European State Michael Oakeshott, 2011-10-27 *The Vocabulary of a Modern European State* is the companion volume to *The Concept of a Philosophical Jurisprudence* and completes the enterprise of gathering together Oakeshott's previously scattered essays and reviews As with all the other volumes in the series it contains an entirely new editorial introduction explaining how the writings it contains find their place in his work as a whole It covers the years 1952 to 1988 the period during which Oakeshott wrote his definitive work *On Human Conduct* The essay from which the volume takes its title was intended as a companion piece to the third part of the latter work and is just one of over sixty pieces that it includes The volume draws together critical responses to works by major philosophers historians and political theorists of his own generation such as Bertrand de Jouvenel Herbert Marcuse and Michael Polanyi as well as to some major figures of current scholarship such as Quentin Skinner and Roger Scruton *Amnesty, Serious Crimes and International Law* Josepha

Close,2019-05-16 Amnesty Serious Crimes and International Law examines the permissibility of amnesties for serious crimes in the contemporary international order In the last few decades there has been a growing tendency to consider that amnesties are prohibited in respect of certain grave crimes However the question remains controversial as there is no explicit treaty ban and general amnesties continue to be frequently issued in post conflict and transitional contexts The first part of the book explores the use of amnesties from antiquity to the present day It reviews amnesty traditions in ancient societies and provides a global picture of modern amnesties In parallel it traces the development of the accountability paradigm underpinning the current prohibitive stance on amnesties The second part assesses the position of modern international law on amnesties It comprehensively analyses the main arguments supporting the existence of a general amnesty ban including the duty to prosecute international crimes the right to redress of victims of human rights violations international standards and trends in state practice and the mandate of international criminal courts The book argues that while international legal or policy requirements restrict the freedom of states to extend amnesty in respect of serious crimes or the effectiveness of amnesty measures in preventing the prosecution of such crimes these restrictions do not add up to an absolute and universal prohibition

Liberal Roots of Far Right Activism Lars Erik Berntzen,2019-10-16 This book explores the anti Islamic turn and expansion of the far right in Western Europe North America and beyond from 2001 and onwards Driven by terror attacks and other moral shocks the anti Islamic cause has undergone four waves of transnational expansion in the period since 2001 The leaders and intellectuals involved have varied backgrounds many coming from the left uniting historically opposed sets of values under their banner of a civilizational struggle against Islam The findings presented in this book indicate that anti Islamic initiatives in Western Europe and the United States form a transnational movement and subculture characterized by a fragile balance between liberal and authoritarian values The author draws on a broad array of data sources and methods including network analysis and sentiment analysis to analyze the impact of the anti Islamic expansion and turn at a macro level and the theoretical implications for our understanding of the current far right flowing from this Offering an overview of anti Islamic activism the book explores the background of their leaders and ideologues provides an in depth look at their ideology online organizational networks and the views expressed by their online members as well as which emotions and messages continue to drive their mobilization The book will be of interest to scholars in the social movement field as well as political scientists sociologists and general readers interested in issues such as populism extremism and understanding the ways in which the contemporary far right challenges liberal democracies **Pluralism**

and Law A. Soeteman,2013-04-17 AREND SOETEMAN In the past we lived on one earth but in many different worlds Different civilisations in regions far apart knew about one another at least from about the 16th century they competed with one another or tried to dominate the other they influenced one another but in many important aspects they were independent from one another Somewhere in the 20th century however this changed There is no far apart anymore We have lived through

two European wars which developed into world wars Modern aeroplanes allow us to travel in only a couple of hours around the world Instant communication between individuals who have the whole globe in between is a reality There still exist great differences between different civilisations But they can ignore one another only at their peril They deeply influence one another Today therefore we live in one world Conflicts in the Middle East in Rwanda and Uganda or in the former Yugoslavia have their impact all over the world Violations of human rights no matter where are increasingly considered to be the concern of all of us The whims and caprices of some dictator may influence the spending possibilities of the general public far away
