Modern Ideas Of Evolution:

Modern Ideas of Evolution as Related to Revelation and Science Sir John William Dawson, 1906

Modern Ideas of Evolution J William Dawson, 2025-05-22 Modern Ideas of Evolution examines the development of evolutionary theory in the late 19th century. Authored by J William Dawson, this volume offers a critical perspective on Darwinism and natural selection. It provides valuable insights into the scientific debates of the time and the diverse interpretations of evolutionary processes. Dawson's work serves as a historical document capturing the nuances of scientific thought during a pivotal era in the history of science. Readers interested in the history of evolutionary biology will find this book to be a rich resource. It showcases the complexities of early evolutionary thought and its impact on modern scientific understanding. This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. Modern Ideas of Evolution as Related to Revelation and Science John William Dawson, 2021-03-10 Darwin's theory of evolution generated a storm of controversy within the scientific community in the later nineteenth century, and Sir J William Dawson, a renowned geologist of his time, was one of those who vehemently opposed it. In *Modern Ideas of Evolution as related to Revelation and Science*, first published in 1890, Dawson maintains that it is religion alone that forms a stable base for all new ideas. He dismisses the theory of evolution as a crude and heretical hypothesis inconsistent with religion and undeserving of acceptance. If adopted as proven truth, he argues, it would lead to unscientific and unspiritual degeneration of the mind. More than a century later, evolution is generally accepted but still not proven, and the debates continue. Dawson's energetic polemic remains a key document for historians of science concerned with the Victorian reception of Darwinism and the rise of evolutionary theory.

Modern Ideas of Evolution as Related to Revelation and Science (1890) John William Dawson, 2008-06-01 This scarce antiquarian book is a facsimile reprint of the original. Dickins, Benjamin J.A. Dickins, 2023-03-08 This book is reflecting upon core theories in evolutionary biology in a historical as well as contemporary context It exposes the main areas of interest for discussion but more importantly draws together hypotheses and future research directions The Modern Synthesis MS sometimes referred to as Standard Evolutionary Theory SET in evolutionary biology has been well documented and discussed but was also critically scrutinized over the last decade Researchers from diverse disciplinary backgrounds have claimed that there is a need for an extension to that theory and have called for an Extended Evolutionary Synthesis EES The book starts with an introductory chapter that summarizes the main points of the EES claim and indicates where those points receive treatment later in the book This introduction to the subjects can either serve as an initiation for readers new to the debate or as a guide for those

looking to pursue particular lines of enquiry The following chapters are organized around historical perspectives theoretical and philosophical approaches and the use of specific biological models to inspect core ideas Both empirical and theoretical contributions have been included The majority of chapters are addressing various aspects of the EES position and reflecting upon the MS Some of the chapters take historical perspectives analyzing various details of the MS and EES claims Others offer theoretical and philosophical analyses of the debate or take contemporary findings in biology and discuss those findings and their possible theoretical interpretations All of the chapters draw upon actual biology to make their points This book is written by practicing biologists and behavioral biologists historians and philosophers many of them working in interdisciplinary fields It is a valuable resource for historians and philosophers of biology as well as for biologists Chapters 8 20 22 and 33 are available open access under a Creative Commons Attribution 4 0 International License via link springer.com
