The Chomsky Update (RLE Linguistics A: General Linguistics) Raphael Salkie, 2014-01-10 Noam Chomsky has been described as arguably the most important intellectual alive His revolutionary work in linguistics has aroused intense scholarly interest while his trenchant critique of United States foreign policy and his incisive analysis of the role of intellectuals in modern society have made him a prominent public figure Raphael Salkie's timely book introduces the two parts of Chomsky's work and explores the connections between them He provides an accessible and up to date introduction to Chomsky's linguistics laying out his basic assumptions and aims in particular his consistent drive to make linguistics a science and looking at a sample of Chomsky's recent work He examines the implications for other fields such as philosophy and psychology as well as the main challenges to Chomsky's position Raphael Salkie also sets out the key themes in Chomsky's political writings and his libertarian socialist views He contrasts the official line on US foreign policy the view that the US is a well meaning blundering giant with Chomsky's carefully argued alternative view By focusing on Chomsky's conception of human nature and human freedom the author draws out the links between the two sides of Chomsky's work in the belief that both sides raise issues which can profitably be explored The author also provides a carefully annotated guide to further reading As an experienced teacher of linguistics with a commitment to political activism Raphael Salkie is uniquely qualified to present this introduction to one of the seminal thinkers of our time First published in 1990

Language in the News Roger Fowler, 2013-10-08 Newspaper coverage of world events is presented as the unbiased recording of hard facts In an incisive study of both the quality and the popular press Roger Fowler challenges this perception arguing that news is a practice a product of the social and political world on which it reports Writing from the perspective of critical linguistics Fowler examines the crucial role of language in mediating reality Starting with a general account of news values and the processes of selection and transformation which go to make up the news Fowler goes on to consider newspaper representations of gender power authority and law and order He discusses stereotyping terms of abuse and endearment the editorial voice and the formation of consensus Fowler's analysis takes in some of the major news stories of the Thatcher decade the American bombing of Libya in 1986 the salmonella in eggs affair the problems of the National Health Service and the controversy of youth and contraception

Reflections on Persian Grammar Abe Soheili, 2017-08-21 This book is the first authoritative survey of the historical developments of Persian grammar from the first attested work some 200 years ago to the present day It examines the development of Persian linguistic thought in five different periods and analyses the underlying assumptions of the grammars belonging to each period in light of contemporary ideas on the nature of grammar and new frameworks for grammatical analysis This historical survey shows the profound influence of Arabic and Western linguistic thinking on the development of Persian grammar as well as a dramatic shift of perspective from a traditional grammatical analysis to new and divergent procedures adopted by

more recent schools of linguistics The end result of this transition has culminated in less reliance on foreign influence and the emergence of more self motivated independent researchers in the uncharted territory of Persian grammar and its sub components The two comprehensive Persian and English glossaries at the end of the book will enable readers to better understand the grammatical concepts covered here
