**Bibliography of Nautical Books** Alan Obin,1999 *Military Review* ,2007 *Review of Current Military Literature* ,2007 [Indian Naval Strategy in the Twenty-first Century](#) James R. Holmes,Andrew C. Winner,Toshi Yoshihara,2009-04-02 This is the first

academic study of India's emerging maritime strategy and offers a systematic analysis of the interplay between Western military thought and Indian maritime traditions. By a quirk of historical fate, Europe embarked on its Age of Discovery just as the main Asian powers were renouncing the sea, ushering in centuries of Western dominance. In the 21st century, however, Asian states are once again resuming a naval focus, with both China and India dedicating some of their newly found wealth to building powerful navies and coast guards and drawing up maritime strategies to govern the use of these forces. The United States, like the British Empire before it, is attempting to manage these rising sea powers while preserving its maritime primacy. This book probes how India looks at the sea, what kind of strategy and seagoing forces New Delhi may craft in the coming years, and how Indian leaders may use these forces. It examines the material dimension, but its major premise is that navies represent a physical expression of a society's history, philosophical traditions, and culture. This book then ventures a comprehensive appraisal of Indian maritime strategy. This book will be of interest to students of sea power, strategic studies, Indian politics, and Asian Studies in general. James R. Holmes is an Associate Professor of Strategy at the U.S. Naval War College and a former U.S. Navy surface warfare officer. Toshi Yoshihara is an Associate Professor in the Strategy and Policy Department at the Naval War College. Andrew C. Winner is Professor in the Strategic Research Department at the U.S. Naval War College.

**Naval Strategy in Northeast Asia** Duk-Ki Kim, 2012-10-12. Over the past decade, Northeast Asia has been dominated by quite significant strategic change, which is ongoing and brings with it many uncertainties. Naval capabilities in Northwest Asia are instrumental in promoting maritime security interests, helping to build a stable security environment through active participation in regional naval cooperation. This landmark book explores the region's maritime peace and stability and examines in depth the strategic military and geopolitical issues that underpin any effort to develop maritime cooperation.

*The Soviet Art of War* Harriet Fast Scott, William F. Scott, 2019-07-11. No other nation has invested as much intellectual capital in the study of war as has the Soviet Union over the last six decades, and the doctrine, strategy, and tactics that have been developed by Soviet theoreticians are bound to guide any future Soviet military action. *The Soviet Art of War* makes available to Western readers selections from the most significant and influential Soviet military writings from 1917 to the present. The Scotts have examined thousands of Soviet military publications, including the restricted journal of the Soviet General Staff, *Voyennaya Mysl*, to make this book the most comprehensive account of Soviet military theory and practice yet published. The papers they have chosen thoroughly illustrate the development of the basic features of Soviet military art from the days of trench warfare to the era of the nuclear battlefield. These documents demonstrate the emphasis on surprise, on deception, on mass deep penetration of enemy defenses, and on a unified strategy for all services. They also show the forms of military action.

destruction and attrition defense and offense maneuver and position as seen through the eyes of leading Soviet marshals  
generals and admirals The usefulness of this material is further enhanced by the Scotts commentary and their analysis of  
each group of readings
