ABSTRACT

INTRODUCTION: Midwifery care is an essential factor on which the optimum completion of labor depends. Therefore, the correlation between the quality of the professional activities of midwives in the delivery room and the level of satisfaction of patients is of great importance.

AIM: This scientific study is conducted in order to explore and analyze the opinion of patients on the role of the modern midwife during normal birth.

MATERIALS AND METHODS: The study includes 76 patients /women who have given birth/ from the University Hospital for Active Treatment "Stoyan Kirkovich" - Stara Zagora in the period January-June 2016. A criterion for inclusion in the study was a definitive diagnosis - vaginal delivery. A sociological method was used - anonymous questionnaire. The data were processed with the statistical package SPSS.

RESULTS AND CONCLUSION: The results allowed us to draw the conclusion that there is a tendency to neglect the integrated approach in the implementation of obstetric care at the expense of instrumental care. Also, patients define the work of the midwife as a significant factor for the optimal flow of the process of birth.

Keywords: *midwife, labor, patients, satisfaction*

INTRODUCTION

The midwife is a part of the medical team during one of the most important moments for each woman - the birth. Obstetric care is a significant factor, on which its optimal results depend. Present reality, however, registers some negative trends - shortage and turnover of obstetric staff, lowered work motivation of the health care professionals and diminished prestige of the Bulgarian midwife. Simultaneously, the requirements of patients and employers re-

garding the quality of health services are growing. Increasingly discussed among the guild is the problem of the limited competence of midwives in our country compared to their counterparts in the other EU countries.

These trends focus on the correlation between the quality of the professional activities of the midwives in the delivery room and the level of satisfaction of the patients, as well as raise questions about the role of the Bulgarian midwife in the system of maternal health.

Bulgarian legislation (Regulation №19 on approving the medical standard "Obstetrics and Gynecology", Regulation №1 on professional activities that midwives may perform on instruction or by themselves) regulates the activities of the midwife in assisting in a normal birth, namely (2,3):
