Modern Perspectives in Adolescent Psychiatry John G. Howells, 1971 The U S National Institutes of Health NIH presents the full text of a report entitled Workshop on the Medical Utility of Marijuana by the Ad Hoc Group of Experts at the institute The NIH held a two day scientific meeting on February 19 20 1997 to review the scientific data concerning the potential therapeutic uses for marijuana and the need for and feasibility of additional research The group recommends more research on the functional roles of cannabinoid receptors and that risks associated with marijuana should be considered

Contemporary Perspectives in Adolescent Mental Health Alina Cosma, Candace Currie, Gina Martin, Yekaterina Chzhen, Sophie D. Walsh, 2024-10-08 Mental health is a cornerstone of young peoples well being and increasingly a topic of concern The foundation of mental health is largely laid in adolescence and more than half of adult mental health disorders have their onset before the age of 14 Mental health problems are becoming a leading cause of disease burden amongst adolescents globally affecting their achievement of developmental tasks socially personally and academically Poor adolescent mental health has been linked with poor long term adult health morbidity and mortality Optimal mental health requires a positive sense of wellbeing in addition to the absence of clinically significant active mental illness Monitoring adolescent mental health is key for understanding whether efforts to improve young people s mental health at a national and international level are successful The last decades have seen great changes in young peoples lives including technological advancement and the COVID pandemic In examining the pathways to adolescent mental health the proposed research topic will contribute to a better understanding on how this ongoing crisis has affected adolescents

Modern Perspectives in World Psychiatry John C. Howells, 1968

A Resident's Guide to Psychiatric Education M. Thompson, 2012-12-06 This is the inaugural volume of the new series Critical Issues in Psychiatry An Educational Series for Residents and Clinicians It is an appropriate beginning for this book represents a milestone in the evolution of psychiatric education For the first time there will now be a single place where one can find a comprehensive collection of educational goals and objectives to define the broad spectrum of knowledge and skills essential for general and child psychiatry This collection does not represent the bias of a single educator or program Rather it consists of a consensually validated ranking of relative importance for each educational goal and objective as determined by a large and international sampling of experienced psychiatric educators as well as an editorial board with some of the most distinguished names in psychiatric education It is even possible to tell at a glance whether the ranked level of importance is the same or different within several national groups for example Canadians vs Americans This book is intended for all students of psychiatry It is particularly valuable to residents in training but equally so for experienced clinicians preparing

for Board examination or simply attending to the process of continuing education and intellectual renewal While it might well be used by an institution to delineate the dimensions of a training program in psychiatry it is intended primarily for the self evaluation and self monitoring of one s growth as a psychiatrist

The Mosaic of Contemporary Psychiatry in Perspective Anthony Kales,Chester M. Pierce,Milton Greenblatt,2012-12-06 Psychiatry has undergone a dynamic evolution in the last 40 years an evolution to which Dr Louis West made many contributions Psychiatry today and Dr West s career are intertwined in a mosaic of interaction It is therefore fitting that this compilation of essays in honor of Dr West is entitled The Mosaic of Contemporary Psychiatry Current Perspectives The papers collectively form a snapshot of the field of psychiatry today Each chapter offers a historical perspective of the topic discussed followed by a description of modern day issues and a look at the future of psychiatry This book will enhance the knowledge and technical skills of psychiatrists as well as other clinicians in the mental health care field

Principles and Practice of Child Psychiatry Stella Chess,Mahin Hassibi,2013-06-29 Stella Chess s many admirers throughout the world have long looked forward to the day when she would produce her own textbook of child psychiatry They will not be disappointed in this thoughtful and per ceptive account of the principles and practices of the subject written in collaboration with Dr Hassibi It has all the hallmarks we have come to recognize as distinctive of the Chess approach to child psychiatry gentle yet subtle and penetrating always appreciative of the feelings and concerns of both the children and their parents well informed and critically aware of research findings but far from over awed by the contributions of science and above all immensely practi cal Anyone who wants to know how one of the world s outstanding clinicians appraises what child psychiatry has to offer could do no bet ter than to read this book Child psychiatry differs from general psychiatry in being con cerned with a developing organism and it is entirely appropriate that the book begins with an account of child development and of the prin cipal theories put forward to explain it Chess and Hassibi recognize the importance of theory in organizing ideas and in suggesting expla nations but they remain skeptical of how far existing theories do in fact account for the outstanding issues in development They note the limitations of all theories in explaining how development takes place and why individual differences occur in the way they do

President's Biomedical Research Panel, 1976 **Report of the President's Biomedical Research Panel: Supplement 3: Written statements supplementing verbal testimonies of witnesses** United States. President's Biomedical Research Panel, 1976 *Report of the President's Biomedical Research Panel* President's Biomedical Research Panel, 1976 Family Art Psychotherapy Helen B Landgarten, 2013-06-17 An integrated guide to the entire range of clinical art therapy Its scope is immense covering every age range in a variety of settings from schools and outpatient clinics to psychiatric hospitals and private treatment Of special value are the extensive case studies and 148 illustrations The Clinical Specialist in Psychiatric Mental Health Nursing Deane L. Critchley, Judith T. Maurin, 1985 This is the first reference on advanced nursing practices at the clinical specialist level Reflecting a nursing perspective it covers both adult and child psychiatric nursing treatments and discusses individual and group therapy of children adolescents and adults It examines legal and ethical issues related to advanced practice and the relationship of neurophysiology and psychopharmacology to the clinical specialist role The book also includes case studies and up to date reviews of current research theories and clinical practices in the field Adolescent Suicidal Behavior David K. Curran, 2014-05-12 First published in 1987 This comprehensive book addresses the problem of adolescent suicidal behavior in America today It devotes a great deal of attention to sublethal acts or suicide attempts rather than committed suicides This study establishes a progression that discusses the scope and magnitude of the problem and an exploration of the meaning and reasons for adolescent suicide in the individual case **An International Perspective on Contemporary Developments in Victimology** Janice Joseph, Stacie Jergenson, 2020-06-29 This festschrift in honor of the work and legacy of Dr Marc Groenhuisen provides an international and holistic overview of recent developments in victimology taking a global scope but

grounded in everyday experiences of victims Its multidisciplinary perspective reflects a range of approaches and practices in victimology including contributions from the fields of social work criminology sociology psychology and law Firstly the volume introduces new perspectives in victimology and then analyzes different forms of victimization in countries worldwide It gives special attention to victims rights and participation in the criminal justice system detailing victim centered approaches to justice through practices such as restorative justice and restitution Highlighting the growth and development of victimology from a specialization in criminology to an academic discipline in its own right this book reflects the range of approaches and depth of scholarship in the field This will be an essential resource to students of victimology researchers policy makers and victim s advocates
