*The Making of Modern Chinese Medicine, 1850-1960* Bridie Andrews, 2014-04-01 Medical care in nineteenth century China was spectacularly pluralistic herbalists shamans bone setters midwives priests and a few medical missionaries from the West all competed for patients This book examines the dichotomy between Western and Chinese medicine showing how it has been greatly exaggerated As missionaries went to lengths to make their medicine more acceptable to Chinese patients modernizers of Chinese medicine worked to become more scientific by eradicating superstition and creating modern institutions Andrews challenges the supposed superiority of Western medicine in China while showing how traditional Chinese medicine was deliberately created in the image of a modern scientific practice *Historical epistemology and the making of modern Chinese medicine* Howard Chiang, 2015-07-01 This collection expands the history of Chinese medicine by bridging the philosophical concerns of epistemology and the history and cultural politics of transregional medical formations Topics range from the spread of ginkgo s popularity from East Asia to the West to the appeal of acupuncture for complementing in vitro fertilisation regimens from the modernisation of Chinese anatomy and forensic science to the evolving perceptions of the clinical efficacy of Chinese medicine The individual essays cohere around the powerful theoretical methodological approach historical epistemology which challenges the seemingly constant and timeless status of such rudimentary but pivotal dimensions of scientific process as knowledge reason argument objectivity evidence fact and truth In studying the globalising role of medical objects the contested premise of medical authority and legitimacy and the syncretic transformations of metaphysical and ontological knowledge contributors illuminate how the breadth of the historical study of Chinese medicine and its practices of knowledge making in the modern period must be at once philosophical and transnational in scope **Modern Chinese Medicine** ,1984 Modern Chinese Medicine Food Cures Melissa Carr, 2025-01-21 This book explores food nutrition and dietary recommendations from a Traditional Chinese Medicine TCM approach Modern Chinese Medicine Food Cures helps both practitioners and their patients navigate a landscape saturated with conflicting dietary advice This book is a tool to allow practitioners to meet people where they are so they can help them It is also accessible enough for patients to use it for their own self care and dietary adjustments Dr Melissa Carr provides a modern approach to nutrition that is based on TCM s rich history of using food therapy to personalize health and wellness She outlines how TCM can systematically assess an individual s health as well as ways it evaluates how specific foods can impact our bodies Readers are offered a self assessment tool to help understand the five elements for TCM diagnosis and the application of nutritional suggestions by element The basics and key elements of Western nutritional advice are also included as is a handy reference of food recommendations for common symptoms and illnesses while focusing on foods and herbs that are familiar and generally easily accessible to Western readers *Modern Chinese Medicine Volume 1 Chinese Surgery* He-Guang Wu, Rui-Tu Ran, 2012-12-06 Within recent years in the course of increasing international exchanges in the field of

Health Sciences many questions on various aspects of its development in China during the past three decades have been asked by visiting colleagues from abroad particularly on the development and practice of health care in China It has been felt that since most of the medical publications have been in Chinese a language inaccessible to the majority of professionals in other countries a brief review of the clinical and practical aspects of health care in China written in both Chinese and English would be of service in introducing medical practice in China to the medical profession at home and abroad The present volume is the result of collaborative efforts by specialists in the respective disciplines in clinical medicine of Sichuan Medical College Chongqing Medical College Shandong Medical College and Nanjing Medical College Obviously such an undertaking entailed the review of large quantities of publications of China and the contributors are to be congratulated for having successfully completed the selection of appropriate materials included in this space limited volume

**Neither Donkey nor Horse** Sean Hsiang-lin Lei, 2014-09-09 Neither Donkey nor Horse tells the story of how Chinese medicine was transformed from the antithesis of modernity in the early twentieth century into a potent symbol of and vehicle for China's exploration of its own modernity half a century later Instead of viewing this transition as derivative of the political history of modern China Sean Hsiang lin Lei argues that China's medical history had a life of its own one that at times directly influenced the ideological struggle over the meaning of China's modernity and the Chinese state Far from being a remnant of China's premodern past Chinese medicine in the twentieth century coevolved with Western medicine and the Nationalist state undergoing a profound transformation institutionally epistemologically and materially that resulted in the creation of a modern Chinese medicine This new medicine was derided as neither donkey nor horse because it necessarily betrayed both of the parental traditions and therefore was doomed to fail Yet this hybrid medicine survived through self innovation and negotiation thus challenging the conception of modernity that rejected the possibility of productive crossbreeding between the modern and the traditional By exploring the production of modern Chinese medicine and China's modernity in tandem Lei offers both a political history of medicine and a medical history of the Chinese state
