Modern Concrete Materials Binders Additions And Admixtures:

Modern Concrete Materials Ravindra K. Dhir, Thomas D. Dyer, 1999 Concrete will be the key material for Mankind to create the built environment of the next millennium The requirements of this infrastructure will be both demanding in terms of technical performance and economy and yet be greatly varied from architectural masterpieces to the simplest of utilities Modern concrete materials Binders Additions and Admixtures forms the proceedings of the three day International Conference held during the Congress Creating with Concrete 6-10 September 1999 organised by the Concrete Technology Unit University of Dundee

Sustainable Waste Management and Recycling Mukesh C. Limbachiya, J. J. Roberts, 2004 Proceedings of the International Conference organised by the Concrete and Masonry Research Group and held at Kingston University London at 14-15 September 2004 With the introduction of waste legislation in the form of regulations and directives in many parts of the world a significant move towards sustainable waste management is becoming a legal requirement Emphasis is now being placed on increasing recycling and promoting more sustainable waste management practices and greater co-ordination between the public private and independent sectors and all concerned with the management of waste and reusable materials

Sprayed Concrete Lined Tunnels Alun Thomas, 2019-08-20 Sprayed concrete lined SCL tunnels are growing rapidly in popularity due to their versatility The design and construction of both hard rock and soft ground tunnels has been revolutionised by the advent of the SCL method and now the use of permanent sprayed concrete linings has unlocked the true potential of the method to minimise construction costs and times Yet the complex early age behaviour of the sprayed concrete makes the design difficult and requires a robust management system during construction Consequently the great advantages of the method must be balanced against the risks as a few high profile tunnel collapses have illustrated Practising engineers on site in the design office or in client organizations will find this book an excellent introduction It covers all aspects of SCL tunnelling from the constituents of sprayed concrete to detailed design and management during construction Although there is a close interdependence between all the facets of sprayed concrete few engineers have the right breadth of experience and expertise to cover all of them This urgently needs to be transferred to the wider engineering community as SCL tunnels play an increasingly important role in the delivery of the underground infrastructure which modern urban life demands In this second edition beyond a general updating to reflect new developments the sections on permanent sprayed concrete the innovative technology of spray applied waterproofing membranes fibre reinforcement both steel and macrosynthetic and composite lining design have been expanded Sustainability and environmental impact are addressed in a new section

Environmental Design fib Fédération internationale du béton, 2004-01-01 The construction industry including the concrete industry faces the transformation process from the traditional building process to the new approach sustainable construction Environmental aspects represent a key role in this process The principal importance of the environmental impact evaluation of concrete structures follows

from the high amount of concrete structures built around the world every year The specific amount of harmful impacts embodied in concrete unit is in comparison with other building materials relatively small However due to the high production of concrete the final negative environmental impact of concrete structures is significant Any improvement of concrete design principles methodologies of assessment construction and demolition technologies and management of operation and use of concrete structures thus provides a very significant contribution to the general goal the achievement of a development process in the sustainable way The objective of this state of art report is provide the framework of so called environmental design to document Best Available Technology BAT for concrete structures from an environmental point of view and to summarize methodologies for environmental impact evaluation and optimization of concrete structures Although the authors of the report were from Europe and Japan it was attempted to collect information as widely as possible
