Modern Construction Project Management:

Modern Construction Project Management, Second Edition S.L. Tang, S.W. Poon, Syed M. Ahmed, Francis K.W. Wong, 2003-03-01 Paul Van Dyke works in many languages and archives to uncover the history of Pearl River trade. This two volume work is likely to be the most definitive reference work on the major trading families of Guangzhou. *Modern Construction Management* Prof. Frank Harris, Prof. Ronald McCaffer, 2013-02-28 This new edition of a core undergraduate textbook for construction managers reflects current best practice, topical industry preoccupations and latest developments in courses and fundamental subjects for students. While the construction process still requires traditional skills, changes over recent decades today demand improved understanding of modern business production and contractual practices. The authors have responded accordingly and the book has undergone a thorough re-write, eliminating some of the older material and adding new processes now considered essential to achieving lean construction. Particular emphasis is given, for example, to supply chains and networks, value and risk management, BIM, ICT, project arrangements, corporate social responsibility, training, health and welfare and environmental sustainability. *Modern Construction Management* presents construction as a socially responsible, innovative, carbon reducing, manager involved, people orientated, crisis free industry that is efficient and cost effective. The overall themes for the Seventh Edition are: Drivers for efficiency, lean construction, underpinning production management and off site production methods, Sustainability reflecting the transition to a low carbon economy, Corporate Social Responsibility embracing health, safety, modernistic contracts, effective procurement and employment issues, Building Information Management directed towards the improvement of construction management systems. The comprehensive selection of worked examples based on real and practical situations in construction management and methods will help to consolidate learning. A companion website at www.wiley.com/go/MCM7 offers invaluable support material for both tutors and students. Solutions to the self learning exercises, PowerPoint slides with discussion topics, Journal and web references. Structured to reflect site business and corporate responsibilities of managers in construction, the book continues to provide strong coverage of the salient elements required for developing and equipping the modern construction manager with the competencies and skills for both technical and business related areas. **Modern Construction Management** Prof. Frank Harris, Prof. Ronald McCaffer, Andrew Baldwin, Francis Edum-Fotwe, 2020-11-25 While the construction process still requires traditional skills, the dynamic nature of construction demands of its managers improved understanding of modern business production and contractual practices. This well established core undergraduate textbook reflects current best practice in the management of construction projects with particular emphasis given to supply chains and networks, value and risk management, BIM, ICT, project arrangements, corporate social responsibility, training, health and welfare and environmental sustainability. The overall themes for the Eighth Edition *Modern Construction Management* are: Drivers for efficiency, lean construction, underpinning production management and off site production methods, Sustainability reflecting the transition to

a low carbon economy Corporate Social Responsibility embracing health safety and employment issues Modern contractual systems driving effective procurement Building Information Modelling directed towards the improvement of collaboration in construction management systems **Modern Construction Management** Frank Harris, Ronald McCaffer, 1989
