Maine Politics and Government Kenneth T. Palmer, 2009 Remote and thinly populated Maine was long insulated from many of the demographic and economic trends of states to the south Maine Politics and Government traces recent changes in the state s system as agriculture manufacturing and maritime trades have ceded dominance to high tech businesses extensive commercial development and an expanding governmental sector

Maine Politics & Government Kenneth T. Palmer, G. Thomas Taylor, 1992-01-01 Remote and thinly populated Maine has been insulated from many of the demographic and economic trends of states to the south But Maine Politics and Government shows how rapidly this situation is changing In the 1970s and 1980s Maine once dependent on agriculture manufacturing and maritime trades underwent extensive commercial development High tech businesses and fashionable suburbs concentrated in the southern counties began to assert a new political force The authors of this book view these changes in the context of the state s long history Although Maine s population and economy have become more diversified its public policies more complex and its government more professionalized and centralized there remains a remarkable degree of stability in political attitudes And Maine still operates under its original 1819 constitution the amendments added over time have largely maintained its original structure while allowing for changing conditions This book illuminates the workings of Maine s executive legislative and judicial branches and its relations with the federal government as well as local concerns without losing sight of the Pine Tree State s uniqueness

State and Local Finances Under Pressure David L. Sjoquist, 2003-01-01 State and Local Finances under Pressure explores the future of state and local government fiscal systems given the numerous pressures they face from economic legal technological demographic and political forces It explores how these multiple forces play out in terms of the changes state and local governments should and are likely to make The contributors argue that state and local governments must make substantial changes and that failure to act is likely to result in adverse effects and increasing pressures for modifications that are more difficult to implement and more politically unpalatable Without reform state and local fiscal systems will grow increasingly out of sync with economic reality The authors suggest that government responses are likely to be evolutionary but that in 25 years the recorded changes will be substantial The first chapter provides a historic perspective of state and local fiscal trends Each of the subsequent chapters describes the nature of one of the pressures state and local governments face including political and
