The Making of Modern English Society from 1850 Janet Roebuck, 2005-08-04 In the second half of the nineteenth century and the first half of the twentieth century a variety of forces emerged which changed society in many profound and subtle ways The Making of Modern English Society from 1850 uses the findings of recent historical and sociological research contemporary literature and a wide range of historical sources to form a clear picture of the main patterns of the social changes which took place in this turbulent period Jane Roebuck shows how in these hundred years the whole fabric of society altered more rapidly and radically than in any preceding century She gives an account of the dramatic change which occurred in all spheres of national life She demonstrates how the drift towards socialism which began in the nineteenth century gathered

momentum in the twentieth and how massive social change was on produce of the two world wars In the field of economics the author considers the development of the maturing but still primitive industrial economy of the mid nineteenth century into a modern economy based on mass production and mass consumption She also describes the change in emphasis from desire for world power to concern for domestic prosperity and welfare services

Lawyers, Litigation & English Society Since 1450 Christopher Brooks, 1998-07-01 Legal history has usually been written in terms of writs and legislation and the development of legal doctrine Christopher Brooks in this series of essays roughly half of which are previously unpublished approaches the law from two different angles the uses made of courts and the fluctuations in the fortunes of the legal profession Based on extensive original research his work has helped to redefine the parameters of British legal history away from procedural development and the refinement of legal doctrine and towards the real impact that the law had in society He also places the law into a wider social and political context showing how changes in the law often reflected but at the same time influenced changes in intellectual assumptions and political thought Lawyers as a profession flourished in the second half of the sixteenth century and throughout the seventeenth century This great age of lawyers was followed by a decline in the eighteenth and early nineteenth centuries reflecting both a decline in litigation and the perception of the law as slow artificially complicated and ruinously expensive In *Lawyers Litigation and Society 1450*

1900 Christopher Brooks also looks at the sorts of cases brought before different courts showing why particular courts were used and for what reasons as well as showing why the popularity of individual courts changed over the years The Origins of Modern English Society, 1750-1880 Harold Perkin, 1971
