Adam David Morton

Modern Latin American Revolutions:

Modern Latin American Revolutions Eric Selbin, 2018-02-07 In contrast to previous studies that have centered on the institutionalization of revolution in Latin America and the Caribbean *Modern Latin American Revolutions* Second Edition introduces the concept of consolidation of the revolutionary process the efforts of revolutionary leaders to transform society and the acceptance by a significant majority of the population of the core of the social revolutionary project As a result the spotlight is on people not structures and transformation not simply revolutionary transition The second edition of this acclaimed book has been revised to include new information on the cases of Bolivia Cuba Nicaragua and Grenada assessing the extent to which each revolution was both institutionalized and consolidated This edition also boasts expanded coverage on Che Guevara's visionary leadership and an all new section that addresses the future of revolution in Latin America and the Caribbean Dr Selbin argues that there is a strong link between organizational leadership and the institutionalization process on the one hand and visionary leadership and the consolidation process on the other Particular attention is given to the ongoing revolutionary process in Nicaragua with an emphasis on the implications and ramifications of the 1990 electoral process A final chapter includes brief analyses of the still unfolding revolutionary processes in El Salvador and Peru

Latin American Revolutions, 1808-1826 John Lynch, 1994 Identifies incentives and deterrents to revolution and uncovers the roots of Latin American independence finding them in American interests rather than European influence Authors include political figures of the period such as Bolívar and modern historians from Latin America North America and

Contemporary Latin American Revolutions Marc Becker, 2022-01-11 Revolutions are a commonly studied but only vaguely understood historical phenomenon Now updated to include the perspectives of grassroots revolutionary movements and biographies of often marginalized voices this clear and concise text extends our understanding with a critical narrative analysis of key case studies the 1910 1920 Mexican Revolution the 1944 1954 Guatemalan Spring the 1952 1964 MNR led revolution in Bolivia the Cuban Revolution that triumphed in 1959 the 1970 1973 Chilean path to socialism the leftist Sandinistas in Nicaragua in power from 1979 1990 failed guerrilla movements in Colombia El Salvador and Peru and the Bolivarian Revolution in Venezuela after Hugo Chávez's election in 1998 Historian Marc Becker opens with a theoretical introduction to revolutionary movements including a definition of what revolution means and an examination of factors necessary for a revolution to succeed He analyzes revolutions through the lens of those who participated and explores the sociopolitical conditions that led to a revolutionary situation the differing responses to those conditions and the outcomes of those political changes Each case study provides an interpretive explanation of the historical context in which each movement emerged its main goals and achievements its shortcomings its outcome and its legacy The book concludes with an analysis of how elected leftist governments in the twenty first century continue to struggle with issues that revolutionaries confronted throughout the twentieth century

Revolution and State in Modern Mexico Adam David Morton, 2013-10-04 Now in an updated edition this groundbreaking study develops a new approach to understanding the formation of the postrevolutionary state in Mexico. In a shift away from dominant interpretations Adam David Morton considers the construction of the revolution and the modern Mexican state through a fresh analysis of the Mexican Revolution the era of import substitution industrialization and neoliberalism. Throughout the author makes interdisciplinary links among geography political economy postcolonialism and Latin American studies in order to provide a new framework for analyzing the development of state power in Mexico. He also explores key processes in the contestation of the modern state specifically through studies of the role of intellectuals democratization and democratic transition and spaces of resistance. As Morton argues all these themes can only be fully understood through the lens of uneven development in Latin America. Centrally the book shows how the history of modern state formation and uneven development in Mexico is best understood as a form of passive revolution referring to the ongoing class strategies that have shaped relations between state and civil society. As such Morton makes an important interdisciplinary contribution to debates on state formation relevant to Mexican studies postcolonial and development studies historical sociology and international political economy by revitalizing the debate on the uneven and combined character of development in Mexico and throughout Latin America. In so doing he convincingly contends that uneven development can once again become a tool

for radical political economy analysis in and beyond the region A substantive new epilogue engages the main theoretical debates that have emerged since the book was first published while also exploring the dominant geographies of power and resistance that are shaping state space in Mexico in the twenty first century And now a Spanish edition *Revolución y Estado en México moderno México D F Siglo XXI 2017* is available as well Click here to see the book trailer

Revolutions as Organizational Change Baohui Zhan, 2015-09-01 By comparing peasant revolutions in Hunan and Jiangxi between 1926 and 1934 *Revolutions as Organizational Change* offers a new organizational perspective on peasant revolutions Utilizing newly available historical materials in the People's Republic of China in the reform era it challenges the established view that the great Chinese revolution of the twentieth century was a revolution made by the Chinese Communist Party the CCP The book begins with a puzzle presented by the two peasant revolutions While outside mobilization by the CCP was largely absent in Hunan peasant revolutionary behaviors were spontaneous and radical In Jiangxi however despite intense mobilization by the CCP peasants remained passive and conservative This study seeks to resolve the puzzle by examining the roles of communal cooperative institutions in the making of peasant revolutions Historically peasant communities in many parts of the world were regulated by powerful cooperative institutions to confront environmental challenges This book argues that different communal organizational principles affect peasants' perceptions of the legitimacy of their communal orders Agrarian rebellions can be caused by peasants' attempts to restructure unjust and illegitimate communal organizational orders while legitimate communal organizational orders can powerfully constrain the mobilization by outside revolutionary agents such as the CCP In this thorough comparative account of the peasant risings in Hunan and Jiangxi and the role of the Communist Party Professor Zhang casts new light on both the risings themselves and what they can tell us about peasant risings in general This work is strong in both theory and detailed historical research Richard Rigby professor China Institute Australian National University Professor Zhang has beautifully crafted a comparative study of divergent peasant revolutions in two Chinese regions during Mao's long revolutionary war He brings to this task a broad and deep knowledge about revolutionary theory and also a razor-like analytical sensibility which enables him to examine the pros and cons of existing perspectives

Timothy P Wickham Crowley associate professor of sociology Georgetown University [Theorizing Revolutions](#) John Foran, 2003-09-02 In *Theorizing Revolutions* some of the most exciting thinkers in the study of revolutions today look critically at the many theoretical frameworks through which revolutions can be understood and apply them to specific revolutionary cases The theoretical approaches considered in this way include state-centred perspectives structural theory world system analysis elite models demographic theories and feminism and the revolutions covered range in time from the French Revolution to Eastern Europe in 1989 and in place from Russia to Vietnam and Nicaragua

Understanding Revolution Kavous Ardalan, 2020-06-15 This book applies a multiparadigmatic philosophical frame of analysis to the topic of social revolution Crossing two disciplines and lines of literature social philosophy and social revolution this book considers

different aspects of social revolution and discusses each aspect from four diverse paradigmatic viewpoints functionalist interpretive radical humanist and radical structuralist The four paradigms are founded upon different assumptions about the nature of social science and the nature of society Each paradigm generates theories concepts and analytical tools that are different from those of other paradigms An understanding of different paradigms leads to a more balanced understanding of the multi faceted nature of the subject matter In this book the first chapter reviews the four paradigms Using the Iranian Revolution as exemplar the next few chapters provide paradigmatic explanations for a particular aspect of revolution culture religion ideology With this background the book introduces a comprehensive approach to the understanding of revolution The final chapter concludes by recommending further paradigmatic diversity This book will be of particular interest to students and researchers interested in social revolution political sociology and political theory
