Haskew, 2016-02-15 An illustrated history of the aircraft carrier from World War I through World War II the Cold War and today **American and British Aircraft Carrier Development, 1919-1941** Thomas C. Hone, Norman Friedman, 2009-09-01 The development of aircraft carriers and carrier operations sparked a revolution in military affairs changing completely and irrevocably the prosecution of war at sea Previous studies and histories of carrier aviation have focused on just one or two factors such as individual leadership or advances in aviation technology to explain the development of carrier forces By contrast this new history compares the development of carriers and carrier aircraft by two very different navies to illuminate the many factors that effect the

adoption of new military technology Focusing on the critical years after World War I the authors trace the personal organizational and institutional elements that moved the U S Navy and the Royal Navy along different paths of aircraft carrier development and operations In a clear almost conversational tone the authors draw on years of research to explain why and how the Royal Navy lost its once considerable lead in carrier doctrine and carrier aircraft development to the Americans in the years after 1919 Originally asked to produce a study for the Office of the Secretary of Defense that would maximize the value of decreasing defense funds through wise investment in new technologies the authors revised and expanded that work after a wide ranging international search for previously unused primary sources This new effort offers both compelling history and a trenchant essay on how and why military organizations adopt and develop revolutionary technology Its unconventional approach should appeal to readers interested in modern naval history and in revolutions in military affairs

against China in the 1930s to World War II in the Atlantic Mediterranean Arctic and Pacific theaters It begins with French inventor Clément Ader's remarkably prescient 1909 description of an aircraft carrier The book then explains how Britain led the world in the development of aircraft carrying ships soon to be followed by the United States and Japan While ship based aircraft operations in World War I had limited impact they foreshadowed the aircraft carriers built in the 1920s and 1930s The volume also describes the aircraft operating from those ships as well as the commanders who pioneered carrier aviation Aircraft Carriers has benefited from the technical collaboration of senior carrier experts Captain Eric M Brown and General Minoru Genda as well as noted historians Robert M Langdon and Peter B Mersky Aircraft Carriers is heavily illustrated with more than 400 photographs some never before published and maps Volume II which is forthcoming from Potomac Books in the winter 2006/2007 ISBN 978 1 57488 665 8 will cover the period 1946 to the present **The Oxford Illustrated**
