Haskew,2016-02-15 An illustrated history of the aircraft carrier from World War I through World War II the Cold War and today *A Century of Carrier Aviation* David Hobbs,2009-03-19 It is now almost exactly a hundred years since a heavier than air craft first took off and landed on a warship and from the very beginning flying at sea made unique demands on men and machines As warplanes grew larger faster and heavier air operations from ships were only possible at all through constant development in technology techniques and tactics This book charts the progress and growing effectiveness of naval air power concentrating on the advances and inventions most of them British that allowed shipborne aircraft to match their land based counterparts and looking at their contribution to 20th century warfare Written by a retired Fleet Air Arm pilot and and award winning historian of naval flying this is a masterly overview of the history of aviation in the world s navies down to the present day Heavily illustrated from the author s comprehensive collection of photographs the book will be essential reading to anyone with an interest in navies or air power **American and British Aircraft Carrier Development, 1919-1941** Thomas C. Hone,Norman Friedman,2009-09-01 The development of aircraft carriers and carrier operations sparked a revolution in military affairs changing completely and irrevocably the prosecution of war at sea Previous studies and histories of carrier aviation have focused on just one or two factors such as individual leadership or advances in aviation technology to explain the development of carrier forces By contrast this new history compares the development of carriers and carrier aircraft by two very different navies to illuminate the many factors that effect the

adoption of new military technology Focusing on the critical years after World War I the authors trace the personal organizational and institutional elements that moved the U S Navy and the Royal Navy along different paths of aircraft carrier development and operations In a clear almost conversational tone the authors draw on years of research to explain why and how the Royal Navy lost its once considerable lead in carrier doctrine and carrier aircraft development to the Americans in the years after 1919 Originally asked to produce a study for the Office of the Secretary of Defense that would maximize the value of decreasing defense funds through wise investment in new technologies the authors revised and expanded that work after a wide ranging international search for previously unused primary sources This new effort offers both compelling history and a trenchant essay on how and why military organizations adopt and develop revolutionary technology Its unconventional approach should appeal to readers interested in modern naval history and in revolutions in military affairs
