Unmodern Philosophy and Modern Philosophy John Dewey, 2012-05-16 800x600Normal0falsefalsefalseEN USX NONEX NONEMicrosoftInternetExplorer4 In 1947 America's premier philosopher educator and public intellectual John Dewey purportedly lost his last manuscript on modern philosophy in the back of a taxicab Now sixty five years later Dewey's fresh and unpretentious take on the history and theory of knowledge is finally available Editor Phillip Deen has taken on the task of editing Dewey's unfinished work carefully compiling the fragments and multiple drafts of each chapter that he discovered in the folders of the Dewey Papers at the Special Collections Research Center at Southern Illinois University Carbondale He has used Dewey's last known outline for the manuscript aiming to create a finished product that faithfully represents Dewey's original intent An introduction and editor's notes by Deen and a foreword by Larry A Hickman director of the Center for Dewey Studies frame this previously lost work In *Unmodern Philosophy and Modern Philosophy* Dewey argues that modern philosophy is anything but instead it retains the baggage of outdated and misguided philosophical traditions and dualisms carried forward from Greek and medieval traditions Drawing on cultural anthropology Dewey moves past the philosophical themes of the past instead proposing a functional model of humanity as emotional inquiring purposive organisms embedded in a natural and cultural environment Dewey begins by tracing the problematic history of philosophy demonstrating how from the time of the Greeks to the Empiricists and Rationalists the subject has been mired in the search for immutable absolutes outside human experience and has relied on dualisms between mind and body theory and practice and the material and the ideal ultimately dividing humanity from nature The result he posits is the epistemological problem of how it is possible to have knowledge at all In the second half of

the volume Dewey roots philosophy in the conflicting beliefs and cultural tensions of the human condition maintaining that these issues are much more pertinent to philosophy and knowledge than the sharp dichotomies of the past and abstract questions of the body and mind Ultimately Dewey argues that the mind is not separate from the world criticizes the denigration of practice in the name of theory addresses the dualism between matter and ideals and questions why the human and the natural were ever separated in philosophy The result is a deeper understanding of the relationship among the scientific the moral and the aesthetic More than just historically significant in its rediscovery Unmodern Philosophy and Modern Philosophy provides an intriguing critique of the history of modern thought and a positive account of John Dewey's naturalized theory of knowing This volume marks a significant contribution to the history of American thought and finally resolves one of the mysteries of pragmatic philosophy

The Nature of Nurture Emeritus Professor of Human Development Jay Belsky, 2026-01-06

The Age of Capitalism, Consumer Culture, and the Collapse of Nature in the Anthropocene Jack Thornburg, 2024-10-02 The Age of Capitalism Consumer Culture and the Collapse of Nature in the Anthropocene argues that the stability of post industrial postmodern society is threatened by the convergence of three distinct yet interrelated crises environmental degradation capitalist economic development and the primacy of consumption and self absorption as the basis for economic development at the expense of community and social relationships Jack Thornburg contrasts advanced modern society with indigenous cultures in terms of nature and conceptions of the communal self The complex nature of capitalist oriented society has influenced how individuals conceptualize themselves The outcome the author contends is a competitive society in which individuals are alienated living in uncertain times One consequence of these crises all of which derive from the Enlightenment and the concomitant appearance and evolution of capitalism has been the destruction of a worldview balancing and connecting well being with prosperity of the natural world Money and materialism cannot buy happiness as capitalist narrative asserts Thornburg claims that the happiness sought by individuals seeking meaning through consumption can only be realized by reintegrating nature with the human spirit

John Dewey's Theory of Art, Experience, and Nature Thomas M. Alexander, 2012-02-16 Thomas Alexander shows that the primary guiding concern of Dewey's philosophy is his theory of aesthetic experience He directly challenges those critics most notably Stephen Pepper and Benedetto Croce who argued that this area is the least consistent part of Dewey's thought The author demonstrates that the fundamental concept in Dewey's system is that of experience and that paradigmatic treatment of experience is to be found in Dewey's analysis of aesthetics and art The confusions resulting from the neglect of this orientation have led to prolonged misunderstandings eventual neglect and unwarranted popularity for ideas at odds with the genuine thrust of Dewey's philosophical concerns By exposing the underlying aesthetic foundations of Dewey's philosophy Alexander aims to rectify many of these errors generating a fruitful new interest in Dewey

The Passage of Nature Dorothy Emmet, 1992-06-18 The concept of process is often used but seldom discussed In this book the author looks at how a process differs from a series of events facts or even

just things changing She claims causation is best seen in terms of processes and subsequently examines various aspects of this subject Life History and the Historical Moment: Diverse Presentations Erik H. Erikson, H. Erik Erikson, 1977-11-17 One of the most powerful though deceptively simple of current ideas is Erik H Erikson's insight into the nature of the interrelationships of the psychogenic development of an individual and the historical development of the times This insight present in all his work beginning with *Childhood and Society* and particularly examined in *Young Man Luther* and *Gandhi's Truth* finds full and mature expression in the present book Just as Erikson's notion of the identity crisis has been obscured and confused as it has passed into everyday speech so too have glib popularizers misused his notions of psychobiography and psychohistory Thus this book is of supreme importance not merely to set the record straight but more especially to make these vital ideas central to our time fully available To deal with life history and history psychoanalytically Erikson points out means to engage in a kind of circular chronology our inquiry always points to selected periods in the past which in throwing new light on the present suggest new forays into the more distant past Consequently this book opens with autobiography ranges through discussions of Freud and Gandhi and of the meaning of ideas on womanhood and concludes with an examination of the role of psychoanalysis in the evolution of ethics **Nature** Sir Norman Lockyer, 1919 **The world of wonders: a record of things wonderful in nature, science and art. Lutts, 1998-04 An anthology of some of the most celebrated animal stories ever collected Human Nature Grant Ramsey, 2023-08-10 Human nature is frequently evoked to characterize our species and describe how it differs from others But how should we understand this concept What is the nature of a species Some take our nature to be an essence and argue that because humans lack an essence they also lack a nature Others argue for non essentialist ways of understanding human nature which usually aim to provide criteria for sorting human traits into one of two bins the one belonging to our nature and the other outside our nature This *Element* argues that both the essentialist and trait bin approaches are misguided Instead the author develops a trait cluster account of human nature which holds that human nature is based on the distribution of our traits over our actual and possible life histories One benefit of this account is that it aligns human nature with the human sciences rendering the central concern of the human sciences to be the study of human nature This title is also available as Open Access on Cambridge Core **More Than Things** Paul Louis Metzger, 2023-08-08 In a world dominated by things we must work hard to account for one another's personhood Drawing a diverse set of thought leaders Paul Louis Metzger helps us navigate a pluralistic world through a

Father Nature James K. Rilling, 2024-10-01 How and why human males evolved the capacity to be highly involved caregivers and why some are more involved than others We all know the importance of mothers They are typically as paramount in the wild as they are in human relationships But what about fathers In most mammals including our closest living primate relatives fathers have little to no involvement in raising their offspring and sometimes even kill the offspring sired by other fathers How then can we explain modern fathers having the capacity to be highly engaged parents In Father Nature James Rilling explores how humans have evolved to endow modern fathers with this potential and considers why this capacity evolved in humans Paternal caregiving is advantageous to children and by extension to society at large yet variable both across and within human societies Rilling considers how to explain this variability and what social and policy changes might be implemented to increase positive paternal involvement Along the way Father Nature also covers the impact fathers have on children s development the evolution of paternal caregiving how natural selection adapted male physiology for caregiving and finally what lessons an expecting father can take away from the book as well as what benefits they themselves get from raising children including increased longevity and younger brains A beautifully written book by a father himself Father Nature is a much needed and deeply rewarding look at the science behind good paternal behavior in humans
